Pollard Reports As Manager Of **NOTS EM Club**

Reporting aboard to assume duties as Enlisted Men's Club Manager is Vernon M. Pollard, SH1. He comes to NOTS from duty aboard the USS TWIN-ING, DD 540, out of San Francisco.

Originally from Illinois, he entered the Service from St. Louis, Missouri in 1947, and says the Recruiting Officer and the Navy has more than kept its promise for him to see the world. His duties have taken him to Europe, the Pa-

GRADUATION DAY-Dalmacio Matibag, ATC, accepts with a smile his High School Diploma from Burroughs High School. Cdr. Donald Loranger, Commanding Officer, Air Development Squadron FIVE, has the honor of making the presentation. The brief ceremony honored Chief Matibag for his 19 years of night study for the diploma. The broken school time is accounted for by Matibag's 18 years of Naval Service including WW II and the Korean conflict, for which he holds a campaign medal. Other honors are WW II Victory medal, European Occupation, China Service, and UN and American Theater. Born in Batangas, Phillipines, Matibag is married to the former Ramona C. Dulog of Cavite City, Phillipines. Children Gene, Joe and Lety reside in San Diego while their father is stationed with VX-5 at NAF.

Photo Contest Announced by Navy Journal

Photographers throughout the world are invited to submit photographs to the U.S. Naval Institute's Maritime Pho-

The contest is now open and will remain open through December 31, 1965. A prize of \$100 will be awarded to each of 10 winners in the contest and each winning photograph will be published in a special pictorial section of the March 1966 Naval Institute Proceedings magazine.

The contest is open to all interested photographers, amateur or professional, military or civilian. Any photograph pertaining to naval or maritime subjects may be entered provided it was taken in 1964

As many photographs as de-sired may be entered; they may be either black and white prints or color transparencies - the minimum size for prints is 5"x7", the minimum transparency size is 35 mm.

The contestant's name and address should be printed or typed on a separate sheet of paper, and attached to the back of each print, or printed on the transparency mount.

Researching Yields Art In Metal Burning Study

The world of scientific research is well known for the delight it often finds cesses and forms of its own achievements, but rather few researchers enjoy the position of Charles M. Drew, a chemist in Research Department's Chemical Kinetics Branch.

Charles Drew's work itself, in the field of metal combustion, produces what might be considered a new photographic art form. Burning metal particles pose themselves for him, on glass microscope slides, with flared and twisted smoke clouds that borrow from a prism of colors.

The color photographs he then takes, when printed on dye - transfer or "Type C" paper, are not only highly useful in studying the combustion behavior of aluminum, but also decorate the walls of his home: the home of Dr. J. H. Wakelin, former Assistant Secretary of the Navy for R&D and now a NOTS Advisory Board member, and even walls in the Pentagon and Navy Department

Drew's work has drawn the attention of Astronautics and Aeronantics magazine, which used one each such photograph on the covers of its September, 1963, and November, 1965, issues.

"I'm doing this research work as part of a contract the Department has with the National Aeronautics and Space Administration," Drew explains. "We've been working on a metal combustion study project for a couple of years, and the first report is being prepared now. I have chapter four of it."

The research may have an important use in improving solid propellants, among other possible applications.

Drew produces the burning aluminum particles, each only

about seven tenths of a milli meter (70 microns) in diameter, by causing them to drop into the exceedingly hot flame pro duced by one of a variety of combustible gas combinations. The burning particles then hit a glass microscope slide, which has been aluminized on one side to render the smoke trails more visible.

Upon touching the slide, the particle, still surrounded by and trailing its cloud of smoke cools suddenly and "freezes' itself into a perfect twodimensional pose-the ideal goal of many a Victorian Age portrait photographer.

"The photographs I get of aluminum particles in various stages of combustion suggest so many things to people,

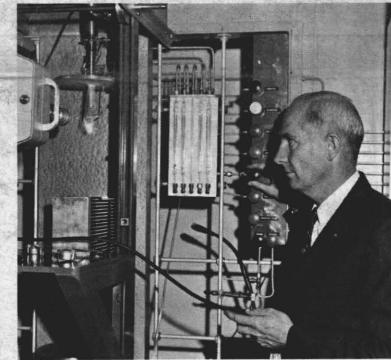

(Continued on Page 3)

ARTIST AT WORK-Charles Drew (above, right) adjusts gas mixture (carbon monoxide and oxygen here), presses the button, and releases a 70-micron aluminum particle through burner (just in front of high-speed camera lens). PARTICLE IN A TAILSPIN (above), photographed after it hit microscope slide, looks as it did in mid-air.

SCIENCE-FICTION? ABSTRACT ART? No, it's a photo of two aluminum particles as they hit microscope slide, still burning. Colorful in the original due to light refraction, photo is not grainy-"grain" is cloud of combustion particles. Drew discovered that original particles gave off vaporized metal which then condensed into sub-particles, and that burning occured on surface of each of these.

JEWISH MESSAGE

By (Student) Rabbi Stephen J. Einstein

Heroism

I served as a counselor at a religious camp this past summer. The theme of the elementary school sessions was "Biblical Heroes." We discussed such figures as Abraham, Moses, and David with the hope that the children might take the ideals of these men and make them part of their own lives.

Each of us has a longing to be a hero, but few of us ever get the chance to take a child from a burning house or to command a ship that wins an historic naval victory. Still we can be heroes. The parent who helps his child with an arithmetic problem is more a hero to that child than any famous person in a book could ever be.

Heroism lies in small acts of kindness even though they are not reported on the front page of newspapers. Shammai, a rabbinic teacher of two thousand years ago, said, "Say little and do much, and receive all men with a cheerful countenance."

There are too many braggarts in the world who talk a good deal but do very little for others. There are also many people who have forgotten the art of smiling.

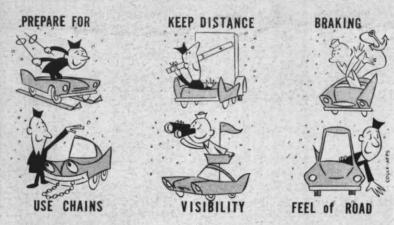

What Shammai expressed in one sentence, others have failed to say in entire volumes. A good deed and a smile are all that is required to become a hero.

-EDITORIAL-Winter Takes Driving Care

During the winter months ice, snow, heavy rains and generally bad weather substantially increase possibilities for automobile accidents.

It is especially fitting that December has been named "Safe Driving Month." Armed Services personnel do a lot of driving in the winter, with trips home for the holidays or moving from one assignment to another. They should be more than alert to the dangers of winter driving.

Every car should be winterized, equipped with snow tires or chains, and kept in good mechanical condition. Defrosters and windshield wipers should be checked and if necessary repaired or replaced. Never drive your car on the road until

all windows are clear. You can't avoid an accident if you don't see it coming.

But no matter in how good a condition the car is, safety ultimately depends on the driver. Winter or summer, a good driver is always on the defensive, assuming the other driver will be less careful or familiar with road conditions. Caution is even more necessary when roads are slippery with ice or packed snow. A driver applying his brakes will obviously not stop can be said for children is that as quickly as he would on a dry surface, or may not stop at all. they never pull out pictures of The wise winter driver approaches every stop sign as though their grandparents. it was his last. Be cautious-not a casualty. (AFPS)

Our Maturango Museum has evolved into a real institutiona great success. And it didn't just happen.

By "POP" LOFINCK

This is how it started. In 1962, Mrs. Rea Blenman, wife of Captain Charles Blenman who was Station Commander at that time-was of the opinion that the community needed a museum for the display of artifacts and relics of the area.

So Mrs. Blenman got together a planning committee-and a year later the museum was dedicated.

It has been the continuing Navy policy to protect and preserve wild life and historical places wherever possible. So the Station Command set aside a quonset hut for this purpose. Through consideration of the Navy our museum continues to be housed on the China Lake Base.

DESERT LORE IS PURPOSE OF MUSEUM

It is the aim of the Museum Board of Trustees to put this joint China Lake-Ridgecrest cultural organization in its own properly constructed building at Ridgecrest in the coming years.

The purpose of the Maturango Museum is the promotion of increased knowledge and interest and appreciation of the Upper Mojave Desert. Historical and geological. To collect facts and fables about ghost towns and old characters, while it's still collectible, and pass on this heritage to future generations. It's entertaining, educational and a responsibility.

The word "maturango" comes from a mixture of Indian and Spanish and means "horse thief" or "bad horseman"-depending on the area.

Why the U.S. Geodetic Survey and map makers gave that name to a beautiful mountain peak, in the Argus Range, 8850 feet, I haven't found out yet. But there it is.

IT'S RIGHT CLOSE BY FOR EVERYONE

Since the Museum opened December 1, 1962 an estimated 15,000 people have looked at the exhibits. Visitors have come from all parts of the United States and more than 40 foreign countries. And yet I've talked to many individuals living on the Base who have not yet visited the Museum.

That's human nature-go a long ways to see something of interest and postpone seeing very interesting things close by.

Another possible reason for this is a wide spread misunderstanding that a museum membership card or an admission charge is required.

I want to re-emphasize that membership is not required. There is not and never has been an admission charge. And the lectures are free.

Membership is required to accompany the Museum sponsored guided field treks, and the fees pay for building more exhibits that require carpentry.

We have the good fortune on this Base of having an outstanding authority on almost every department of nature. One of these authorities usually acts as leader-whether it be flowers, birds, animals, geology, reptiles, earthquakes, volcanoes, spelunking, etc.

BE A MEMBER - THERE'S ADVANTAGES!

The usual museum memberships are: Active \$5.00, Family \$10.00, and Students \$1.00. (Membership renewal time is upon us again-good until January 1967.)

Members receive a monthly letter telling of the future programs. Saturday or Sunday field trips are usually preceded by a lecture on the subject in the auditorium of the Weapons Exhibit Center. Entertaining and eductional.

Your membership will nourish your civic pride in supporting such a beneficial community institution.

Alice Dubin, present curator, says, "This is your museummake the most of it."

She has agreed officially to be our curator, filling the vacancy created by Sylvia Winslow's retiring. Alice worked with Sylvia long before she had the title of Assistant Curator. So we are very lucky. There could not be a better successor for the situation.

Maturango Museum's address is: P. O. Box 5514, China Lake, California 93556.

MANY PITCH IN TO MAKE IT WORK

Many people have contributed to the success of the Maturango Museum-a list too long for this column. At the head of the list of those who deserve special mention, I would put Rea Blenman, Founding Director; Sylvia Winslow, Founding Curator; and Kenneth H. Robinson, present director.

It seems that whatever happens to or about the Museum, Ken Robinson is carrying the ball-because he knows how to start-when to start-and how to get the idea carried through to a finish

On December 10 is a lecture on the story of Boron, and Saturday December 11, the next day, a trek through the Borax mine

The Museum is open to the public throughout the entire year on Saturdays and Sundays from 2 p.m. to 5 p.m. and by special appointment during the week.

NORMAN F. REIDER ... flashes retirement smile.

JOINT EFFORT on a Beneficial Suggestion paid off for R. Q. Nutter, P7122 (center), and R. L. Eddins, Code 70752, China Lake (not shown), for rest room improvements. Frank Eltz, P712 Division Head (I), and Lt. T. L. Lonegan, Assistant Public Works Officer, made the check presentation. Nutter has been with NOTS for 14 years. Residents of Pasadena, he and his wife, Mattie Lee, have two sons, one of whom is a student at Los Angeles State College.

PROMOTIONAL OPPORTUNITIES

Present Station employees are encour-aged to apply for the positions listed below: Applications should be accom-panied by an up-to-date Form 58. The fact that positions are advertised here does not preclude the use of other means to fill

To apply for vacancies, contact Nancy Reardon, Pasadena Personnel Division, Extension 492. A current SF-58 must be submitted when applying.

Range: \$3.40 to \$3.68; Code P8094-Sets up and operates Clerk (Typing), GS-4 or GSvarious machine tools includ- 5, Code P75401-Provides ading lathes, boring mills, milling ministrative and clerical asmachines, precision grinding sistance to Assistant Head. machines, shapers, etc. Works Patent Division. sembling of machined parts. Industrial Specialist, GS-11, PD: 3P25010, Code P2564-Responsible for contracting for specialized manufacturing of developmental hardware. Diversified knowledge of manufacturing techniques and processes involving metal, plastics and other material and a comprehensive knowledge of Machinist; Hourly Salary government procurement practices required.

QUALITY STEP INCREASES are awarded to Robert Hall (P8043) and Robert Marimon (P80421) (third and fourth from left) by L. Z. Maudlin, Head, Simulation and Computer Center. W. E. Hicks, Associate Department Head, UOD (I), and Jack Slaton, Electronics Consultant (r) attended the ceremonies, offering congratulations. Hall, Physicist, has been on station since June 1957. He resides in Monrovia with his wife, Ramona, and their two children-Bryce 3 and Ferron 2. Marimon, a Sr. Electronics Engineer, is a 12-year NOTS man. Residents of Pasadena, he and his wife, Suzanne, have two children-Mark 8, and Melissa 1.

We are missing a friendly negatives from the archives familiar face in the Photo Lab since 1955.

Norm Reider Bids Farewell

since the recent retirement of

Reminiscing on his Federal Norm Reider, who has been career which had its beginning satisfying personnel requests in the Bremerton Navy Yard by searching out pictures and in 1940, his most vivid memory was his presence at Pearl Harbor on December 7, 1941. Although a lead man and shop planner in the foundry at that time, he was called to the role of fire fighter, concentrating on the stricken USS Ward. He holds a citation for this heroic action.

Norm continued his position at Pearl Harbor during World War II and through 1948 when he transferred to the Long Beach Naval Shipyard. He joined NOTS in 1950 as a first class mechanic, working as a molder in the foundry.

Not one to have idle time on his hands, Norm has filled his leisure time becoming an avid golfer and reaching the pinnacle with a hole-in-one in May 1964. Specifics are-Hole No. 5, 65 yards at the Warner Springs Guest Ranch, Warner Springs, California.

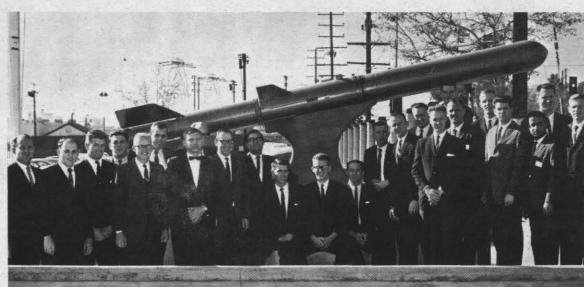

Besides trying for another hole-in-one, Norm and his wife, Charlotte, plan to do some traveling through the southern states in the near future. Goodbye and good luck from all your NOTS friends.

All Tied Up

By RAY HANSON

The Sphinks and the Astro-NOTS were tied for first place in the NOTS Wednesday night bowling league going into the 12th week of play. The Quiet Five and the NOTSings, meanwhile, were tied for second. The joker in the deck was that all four teams were separated by one measly game! The firstplacers boasted identical records of 28 wins, 16 losses, while the runner-ups stood at 27-17. The time has almost come to start issuing steel helmets and sulfa-drug packets, for surely mayhem is in the offing.

High scores for the 11th week are as follows: team series, Sphinks, 3019; team game, El Toros, 1023; men's series, George Monaghan, 628; women's series, Dory Aitchison, 663; men's game, Kent Osborn, 255; and women's game, Barb Paulsen, 246.

BRIGHAM YOUNG UNIVERSITY students and faculty member were conducted on a station tour with briefing on research and development programs and introduction to the Junior Professional Program. D. A. Kunz, Head, Systems Operations Division, arranged the visit in cooperation with the Junior Professional Recruitment Program. Beneficial to both students and the station, it gives the students an opportunity to learn the advantages of Federal employment and the station gains many professional career employees through similar programs. The visitors spent the afternoon on station.

Your Dental Health By DR. JOSEPH G. CHUDZINSKI, Dental Officer

Improper timing.

stressed that the teeth be brushed immediately after eatveals that many patients brush and when they retire. Such

Time Lapse for Decay

years that decay occurs for a period of approximately thirty minutes after a meal has been finished. Digestion of food starts in the mouth and is initiated by chemicals in the saliva called enzymes. If the debris left in the mouth after a meal is not removed immediately, these enzymes start to break down the carbohydrates (potatoes, sugars, pastries, etc.) into acids that attack the enamel. Acid-producing bacteria also contribute. So if you don't brush within thirty minutes after a meal your teeth decay ninety minutes a day if you don't snack. More if

Some People Are Lucky Some people seldom brush and have no decay. True,

generally for two reasons. A person who is fortunate enough to have spent his first 15 years of life in an area with fluoridated water (the China prevent rampant decay.

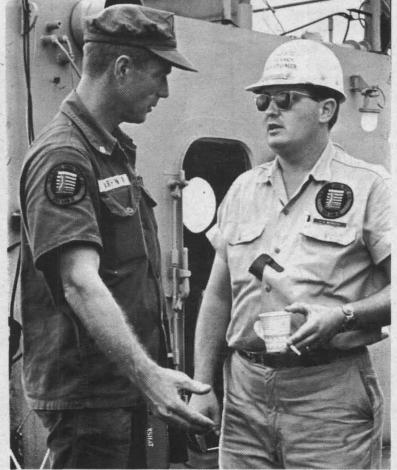

Parents complain that their Lake, Ridgecrest water supply children do brush every day is naturally fluoridated) will but are still plagued with have enamel that is impregcavities. There is a reason in nated with fluoride and is quite the great majority of cases: resistant to mouth acids. It can be compared to corrosion-Remember, it is always resistant steel which resists rust

Another individual may have ing. Investigation usually re- been raised in a fluoride-free area and not be susceptible to when they arise in the morning decay. There are a couple of reasons for this. Either he has brushing is useless for decay a deficient enzyme system in his mouth which breaks down little or no carbohydrate into Studies have shown for many acid, or he doesn't eat much carbohydrate.

Strict Oral Hygiene Indicated for Children

Mention should be made of tooth hardness. All enamel is of about the same hardness. There is such a thing as imperfect enamel. A child who has had a disease associated with a high fever during the formative period of his permanent teeth will have pitted enamel. The pits trap food which is difficult if not impossible to remove. The enamel is imperfectly calcified in these areas, and because of this is more susceptile to even weak acids which might not otherwise attack normal teeth. Such enamel can be compared to mortar that is deficient in cement; it soon washes out from between the bricks. A child with this unfortunate condition must practice strict oral hygiene with frequent dental attention to

CDR. CARPENTER TO DISCUSS SEALAB II AT AOA TUE. MEET

CDR. SCOTT CARPENTER DISCUSSES "Project Sealab II" with Joe Berkich, NOTS Pasadena Range Engineer, aboard the Sealab II staging vessel Berkone. Cdr. Carpenter will be the keynote speaker discussing "Project Sealab II" at the Annual Banquet and Installation of Officers of the China Lake Post, American Ordnance Association on Tuesday, Dec. 14, at the Community Center. Tickets for the banquet are priced at \$5.00 per person and may be purchased from Earl Ellington, Room 110, Michelson Laboratory, or Robert Mc-Kenzie, Room BO-9, Michelson Laboratory. Tickets will not be at door. Today is deadline for reservations.

Drew Makes Art In Probe of Metal

(Continued from Page 1)

says Drew, "that when they ask about the prints in my home, for example, I have to explain all about them.

"The nature of the photographs is sometimes hard to get across even in a technical presentation," he adds. "My listeners may mistake the photograph for one taken of a particle still burning in midair, rather than as it appears after falling on a glass slide. But then, it's not immediately apparent, as the views are quite similar

He points out that mid-air motion pictures are occasionally taken of the particles as they emerge from the burner he uses in Michelson Lab. A highspeed camera exposes some 400 feet of film in three seconds as the particle falls past its telescopic lens.

Such motion pictures, combined with the still pictures, are an aid in research, according to Drew. He points out that each type of photo helps explain the other.

But whatever information Charles Drew's unique photographs may yield for the advancement of solid propellants or for any other line of defense science, the strangely intriguing shapes that emerge on film and paper in the darkroom yield an immediate pleasure for professional and lay viewer alike.

"I know it was Code 30's recruiter Jim Campbell's emphasis of the program which convinced me to come to NOTS in 1960 after receiving my B. S. in Physics at Arizona."

"The NOTS' UCLA Extension Program also enabled me to earn an M. S. in Engineering," Leonard added.

Leonard's thesis for his doctorate was "Vibration Aspects of Large Rocket Motor Test Stands" which was based on data studies of NOTS' Skytop facility.

Presently employed with the Engineering Projects Branch of the Propulsion Systems Division, Leonard is engaged in stability studies for BOMROC.

He married his high school sweetheart, the former Sarah Barham of Tuscon, Ariz. They met while attending Tuscon's Catalina High School. They have three children, Diana, 6; Becky, 3; and Jon

Jr., 1. The family resides at "I'd never have made it with- 1803-A Whithington Road.

Norman R. Smith, Blue Cross Representative from Bakersfield, will be at the Community Center on Wednes- 11 a.m. to 6 p.m. at the Plaza day, December 15, from 9 a.m. Shopping Center in the China the New Year, January 1, ofto 4 p.m.

A free wrapping service will men in uniform from December 13 through December 17.

Christmas gift wrapping as well as wrapping packages for mailing will be provided from Lake Library Building.

MEET Your Councilman

This is the third in a series offered by the Rocketeer to better acquant residents with Community Council precinct representatives.

Lt. Edward E. Luetschwager, NAF Line division officer, was first elected to the Community Council for Precinct 3 in November, 1964, and

Lt. Edward Luetschwage

was reelected last month for a two-vear term.

Lt. Luetschwager came to NOTS from studies at the Naval Postgraduate School at Monterey in August last year. He and his wife, Marlene, make their home at 207-B Byrnes with their one year-old son, Bruce.

Last year he served on the Community Improvement, Housing and Election Committees of the Council, and is now a member of its Nominating Committee

Be A Member Of the Crowd

China Lake Civil Service Employees: Now is your chance to become a member of the crowd that's not in line at the bank on payday. By signing up to have your paycheck automatically deposited in your account, you can avoid the rush to the bank on pay-

day. You may take advantage of this convenience by filling out the required forms at the Disbursing Office anytime during normal working hours before Dec. 30, 1965.

Notary services will be available free of charge.

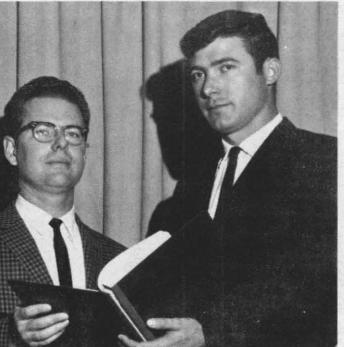

Those who sign up during this period will have their paychecks deposited automatically starting payday of Jan. 7, 1966.

All requests now in effect will remain in effect unless a request for cancellation is received prior to Dec. 30, 1965.

It is necessary to have your pay number and checking account number when signing up for the automatic deposit.

Holiday Bank Hrs.

The China Lake Bank of America Facility will be open on Thursday, December 23, be available to enlisted military from 11:30 a.m. to 5:30 p.m. (Friday hours), and will keep Thursday Hours (10 a.m. to 2 p.m.) on Friday, December 24. The above same banking hours will be in effect on the Thursday and Friday before ficials of the bank said.

LOSING A WORKER - Larry Mesple (r) and Community Council president Dick Frederick review Council records before the executive VP's departure for new work for the "Alianza Para Progreso" in Washington, D.C. He has represented Precinct 2
