### Seafarer not open for evening meal on Friday, May 25

On May 25, the Seafarer Club will be closed for evening dining. Lounge facilities, however, will remain open. For further information, call the Seafarer Club at 446-6929.

Normal schedules for Seafarer Club operations will resume following the Memorial Day holiday weekend.

### Safe and sane grad party set for O'Club on night of June 7

Graduation night is becoming a safer and richer tradition in the Indian Wells Valley as local high school grads are treated to an all-nighter sponsored by the Committee for a Safe Graduation (CFSG'90).

On June 7, the third annual graduation night party will be held from 10 p.m. until 5 a.m. the following morning in the patio/pool area of the Naval Weapons Center Officers' Club. All Indian Wells Valley graduating students are invited to bring one guest.

The main idea behind the party is to help save lives on graduation night by providing young people with the action they would be seeking elsewhere.

China Lakers living near the O' Club should plan for more noise than usual and understand the noise is on behalf of a very worthwhile goal, a safe, good time graduation party.

## New Tech Library formally opens

Ribbon cutting ceremony marks official relocation of important information research facility

Dozens of guests, patrons and friends, watched as Capt. Douglas W. Cook, NWC Commander; William B. Porter, NWC Technical Director; and Mary-Deirdre Coraggio, head, Library Division, cut the ribbon officially opening the Technical Library's new home in the Michelson Lab compound on Tuesday morning.

Jo Cherry, associate head, Technical Information Department, welcomed all the visitors and thanked the people responsible for the successful transition of buildings, which, she said, was done with a minimal amount of disruption to the library's regular routine.

Porter called Carl Schaniel, retired NWC department head, from the audience to take an active part in the ribbon cutting ceremony as "he (Schaniel) played a key part in the planning and pushing the relocation through," Porter noted.

The building which used to house the Technical Library, located on Blandy Avenue, was identified as severely vulnerable in the event of an earthquake. "This threat," said Porter, "made it imperative that NWC protect our people and also save one of NWC's most

valuable resources, the Technical Library's vast collection of research materials."

At one time, noted Porter, the Technical Library had been located in Michelson Lab and it was always planned that someday the library would be moved back to Michelson Lab. Even though the library's Technical Services Branch is located at 115 Hussey and Inyokern roads, and the Technical Library's main offices are located at 114 Bard Street, NWC's Technical Director noted eventually they hope to move all of the Technical (Continued on Page 8)

IT'S OFFICIAL--On Tuesday, (left to right) William Porter, Mary-Deirdre Coraggio and Capt. Douglas Cook cut the ribbon signifying the official opening of the Technical Library's new home. Other members taking part in the ceremonies were (left to right) Jack Russell, Char-Lou Dinger, Sterling Haaland, William C. Bonner, Jo A. Cherry and Capt. Kenneth C. Kelley.

## Health and wellness expert talks fitness to China Lake audience

In a fitting finale for National Physical Fitness and Sports Month, the Naval Weapons Center Wellness Branch has invited Dr. Elizabeth A. (Betsey) Downing to give a series of talks to all hands on May 30 and 31. The talks will cover such topics as nutrition, motivation, behavior change strategies, how to reduce stress, fitness for couch potatoes and relaxation techniques.

Not only is Downing a seminar leader and lecturer on health and wellness, she is also president of her own company, the Health Advantage, and adjunct faculty member of the Federal Executive Institute (FEI) in Charlottesville, Virginia. Downing

designed the FEI Executive Wellness Program and expanded it to its present form.

Currently, Downing works with a variety of agencies, including the Department of Agriculture, the Internal Revenue Service, NSA and the Senior Executive Seminar at the State Department's Foreign Service Institute.

With a bachelor's degree in sociology and psychology from Miami University in Oxford, Ohio and a master's degree in Urban Education from Simmons College in Boston, Downing went to the University of Virginia in Charlottesville and received her Ph.D. (Continued on Page 6)

## FEB:

Four from NWC earn nomination for special honor

Four China Lakers were honored last Friday by the Los Angeles Federal Executive Board (FEB) during its 17th Annual Distinguished Public Service Awards Program. Charlene W. Neff, Melvin R. Mather, Adell Virginia Sharless and John J. Hammonds were among 148 other federal employees from southern California who were nominated as "outstanding individuals in the area of public service." Neff distinguished herself and the Naval Weapons Center by being named runner-up in the Outstanding Clerical Employee Award Category.

A security clerk in the Intercept Weapons Department, Neff was nominated for the award by Sandy Rogers, acting head, Intercept Weapons Department.

As the department's Custody Control Point (CCP) since 1979, Neff is responsible for the accountability, control, transmission and destruction of over 11,000 Secret documents. "She has set up an excellent document control system and successfully carries out her duties in an exceptionally effective, efficient and professional manner, with meticulous attention to detail," wrote Rogers in the nominating letter. In addition, Rogers noted Neff shares her knowledge and (Continued on Page 11)

# Wellness Corner

More than 400 employees have already taken part in National Physical Fitness and Sports Month. There are still many lectures and activities to participate in.

**May 21 -- Breast Cancer Awareness Seminar**, by Bonnie Davis. The best way to fight breast cancer is through early detection. This seminar will cover self breast examination techniques and information regarding mammograms. Mammography is an accurate, safe, and easy method of early detection of breast cancer. We realize the topic of breast cancer can be scary, however early detection can and does save lives. In June, a convenient, low cost mammography screening program will be offered on Center. Set 3 to 4 p.m. at Training Center (walk in).

**May 22, 23 -- Dietary Control of Cholesterol**, by Dr. Richard Neil, M.D., M.P.H. This seminar, in two half-day sessions, provides a comprehensive review of how the diet can be used to lower blood lipids as an endeavor to prevent or control heart disease. Although not a requirement, attendees are encouraged to bring their status reports from the Wellness Program assessments, blood analysis, a calculator (a must), and a one-day diet history.

**May 24 -- Allergies**, By Dr. Ipbi Kim, M.D. Allergies! Why itching eyes, runny nose, sinus problems, rashes, hives, and headaches?? A review of theory and treatment from ancient times, focusing on current theories and management. Scheduled from 1 to 2:30 at the Training Center (walk in).

**May 25 -- Stretching at the Office**, by Betty Miller, M.S. Are your shoulders tight and fatigued from slaving over the computer or desk all day? Are you tense and irritable? Or are you none of the above and interested in some easy stretches that you can do in an office setting? Attend this session and experience stretching exercises. They help maintain flexibility, range of motion, and improve posture.

**May 29 -- Breast Cancer Awareness Seminar**, is a repeat Seminar by Bonnie Davis. The best way to fight breast cancer is through early detection. This seminar will cover self breast examination techniques and information regarding mammograms. Mammography is an accurate, safe, and easy method of early detection of breast cancer. We realize the topic of breast cancer can be scary, but early detection can and does save lives. In June, low cost mammography screening will be offered on Center. \*\*\*\*

National Physical Fitness and Sports Month at the Naval Weapons Center concludes with a series of talks by Elizabeth A. (Betsey) Downing, Ph.D., a seminar leader and lecturer on health and wellness. All talks are on a walk-in basis and will be held in Room 1000D of Michelson Lab. (For more information on this speaker, see story on Page 1.)

**May 30 -- Nutrition for Increased Energy and**

**Improved Health**, 7:30-9:30 a.m. -- Research indicates that diet is related to the major diseases prevalent in our society - heart disease, cancer, diabetes, and stroke. Learn what eating right means! Important skills in this process include understanding nutritional research and recommendations plus the ability to decipher labels and recognize deceptive advertising. Also learn to enhance quality of life by increasing stamina, energy level, and concentration through optimal dietary patterns and choices.

**May 30 -- Motivation**, 10-11:30 a.m. -- We all would like to be healthy and fit and we usually have the best of intentions. All too often, however, motivation dips and efforts decline - pretty soon we're back to former habits. Learn motivation strategies to keep on your program and tips for setting realistic expectations in efforts to attain health and fitness.

**May 30 -- Behavior Change Strategies**, 2-4 p.m. -- Even though there is an abundance of health information in the popular press, research suggests that the average American is sedentary, overweight, and at risk for heart disease. This presentation will address the question of why most people do not engage in the healthful behaviors which they know are good for them. It will also focus on major influences on health behavior, typical barriers to health behavior, and what can be done about them. It is assumed that participants know what health behaviors they wish to improve (cholesterol reduction, exercise, weight loss, stress, etc.). The talk will focus on the development of a set of practical, realistic, gradual strategies for home and work to increase the behaviors that improve health.

**May 31 -- Buffering the Effect of Stress With Psychological Hardiness**, 8-11 a.m. -- Research suggest that stress is a significant problem in today's work force. Excessive stress can lead to lowered productivity and increased risk of illness. As much as 50-80% of all illness are estimated to be stress-related. Recent studies indicate individuals with "psychological hardiness" are resistant to the negative effects of stress. Hardy individuals are high in control, commitment, and challenge, i.e., they feel in control of their lives, are involved with what they are doing, and feel challenged by new experiences. In dealing with stressful situations, hardy individuals use transformational coping strategies more often than regressive coping responses. Learn about topic and how to incorporate hardy behaviors and transformational coping techniques into your life.

**May 31 -- Fitness for Couch Potatoes**, 1-2:30 p.m. -- How much exercise is enough? Do you really have to become a "jock" to be healthy and fit? Presentation is geared toward people who are not currently regular exercisers and would like to become more fit. The basics of an exercise program will be described with tips on how to get started.

**FAREWELL--China Lakers met at the Officer's Club last week to bid farewell to Capt. Paul Valovich, as he prepared to leave NWC for a new assignment as Commanding Officer, Naval Air Station Pt. Mugu. Ron Derr, head of the Research Department, presented Capt. Valovich with a glass sculpture on behalf of Code 38. The Center's gift was a stained glass window by Bud Biery.**

## Save water

Learn other ways to landscape

In urban areas, 45% of the water is used for landscape irrigation. Tomorrow (Saturday) area homeowners will learn of non-traditional alternatives in residential landscaping. The one-day program, presented by High Desert Xeriscape, will run from 8 a.m. to 5 p.m. at the Kerr McGee facility in the new Ridgecrest Civic Center. No pre-registration is required.

Xeriscape encompasses a broad range of design, irrigation and plant selection which provide beautiful, effective and economical results. Leading professionals in the Xeriscape field will provide informative sessions on history, soil, irrigation, design, plants and maintenance.

Exhibits by local and regional merchants, nurseries, gardening suppliers and national manufacturers will be displayed along with environmental and conservation groups' educational exhibits.

For further information, contact Terry Tennant, 446-5521 or Judie Decker 446-4447.

## Armed Forces Day races free with military I.D.

Military personnel and their dependents are invited to attend a free day at the IMI Raceway in Pearsonville for the Armed Forces Day race on Saturday, May 19, starting at 8 p.m. Military identification is required.

Enjoy factory, street and mini stocks as well as limited sportsman, ladies powder puff and open competition.

This invitation is one way the management of the IMI Raceway can express their appreciation to all the Armed Forces that serve the United States of America.

Additional information may be obtained by calling 377-5106, 377-4089 or 446-6583.

## Museum plans docent classes

The Docent Summer School Program at the Maturango Museum will be held June 12-22. Registration for pre-fourth and pre-fifth grade children is being taken at the museum. Cost is \$20 per child for members and \$30 per child for non-members. For more information, call 375-6900.

## Community Events

During Josh's Jamboree at the Desert Empire Fairgrounds, May 24-27, the Kiwanis Club of Ridgecrest will have their pizza booth open for lunch. All proceeds support Ridgecrest organizations and functions. The Kiwanis booth at the fairgrounds is at the corner of the midway.

Once again the Kern County Library Fund-Raising Committee has officially kicked off its second annual campaign to raise money for the Kern County Library Book Trust. All donations are used for the purchase of materials at every Kern County Library branch. Tax deductible contributions can be made payable to the Kern County Library Book Trust and mailed to 701 Truxtun Ave., Bakersfield, CA 93301.

Lt. John Zora, a Naval Weapons Center bombardier-navigator, will be the guest speaker at Maturango Museum's Saturday Adventure tomorrow, May 19, from 4 to 5 p.m. Along with showing a film on flying, the pilot will also bring his flight gear, including his helmet, harness and oxygen mask, to show the audience. He also plans to give out stickers as souvenirs to the children attending the show.

Have nothing to do on weekends? Have a merrie time at the Renaissance Pleasure Faire at the Glen Helen Regional Park in San Bernardino. For four more weekends (until June 10), enjoy food, drink and Renaissance entertainment from 9 a.m. to 6 p.m. Thrill to a battle royal at high noon and revel with Queen Elizabeth I and her Royal Court. Cheer your favorite knight as he battles on horseback to be the Queen's champion. Cost at the gate is \$14.50 for adults and \$7.50 for children.

## SIGAda invites Roush to speak

Linda Roush from the Naval Weapons Center's A-12/NATF Systems Engineering Branch, will be the guest speaker at the next meeting for the China Lake Special Interest Group Ada (SIGAda). The meeting is set for Thursday, May 31, at El Charro Avitia. Dinner will be served at 5:30 p.m. and the presentation will start at 6:30 p.m.

Roush will talk about a series of lessons learned while integrating Ada software development into the Department of Defense Systems Acquisition process.

## Top sailor:

AO2 Steven S. Carpenter saluted as Center's SOQ

Aviation ordnance is the speciality of AO2 Steven S. Carpenter in the Aircraft Department. In fact, Petty Officer Carpenter's attention to detail and his continued demand for excellence earned him recognition as the Naval Weapons Center's Sailor of the Quarter.

Captain Robert Dropp, NWC commanding officer for enlisted personnel, presented the certificate to AO2 Carpenter and said he was very pleased to recognize the outstanding work of the sailors on board NWC.

The citation accompanying the award to Petty Officer Carpenter read in part, "Your demonstrated superb leadership, attention to detail and uncompromising demand for excellence as night shift work center supervisor has made the most significant contribution to the safe and efficient operation of the Ordnance Branch. . .By consistently setting the

standard for dedication, perseverance and esprit de corps, you contributed significantly to the accomplishment of the Naval Weapons Center's mission."

The veteran petty officer is a native of Main and has been in the Navy for more than six years. He has been a part of the China Lake team for the past year.

As Capt. Dropp made the presentation, AO2 Carpenter's wife, Sal and young daughter, Megan, looked on.

NWC's Sailor of the Quarter was praised by Capt. Dropp who said, "Your enthusiasm, eagerness, flexibility and sustained superior performance have placed you head and shoulders above your contemporaries."

Command Master Chief, FCCM John Capazzi, noted Petty Officer Carpenter would be in the competition for NWC Sailor of the Year for 1990.

**SAILOR OF THE QUARTER--AO2 Steven Carpenter holds his daughter, Megan after being congratulated for winning Naval Weapons Center Sailor of the Quarter honors. Capt. Robert Dropp, commanding officer of enlisted personnel, made the presentation. Petty Officer Carpenter's wife, Sal, was also on hand for the ceremony. Photo by PHAN Cary Brady**

## Volunteer band members eyed for June event

Volunteers are needed for the China Lake Band. All area wind or percussion players are encouraged to participate as the China Lake Band provides live music during the Navy retirement ceremony for Capt. Robert Dropp on June 22.

The Naval Weapons Center's Commanding Officer for Enlisted Personnel, Capt. Dropp will wrap up his military career. For more information please call Stan Ricker at NWC ext. 3508/2137.

## Retirement celebration planned for Cdr. Lentz

After 25 years of service, Cdr. Fred Lentz Jr. is retiring from the Navy. For the past four years, Cdr. Lentz has been the Aircraft Department's chief test pilot and has been an active participant in the China Lake community.

A retirement party will be held in his honor of Friday, June 1, at the NWC Golf Course Clubhouse. No-host cocktails will be served from 6 to 7 p.m., followed by dinner from 7 to 8 p.m. Presentations will be given at 8 p.m. The barbeque steak dinner is \$9. For reservations, to arrange a presentation or to donate for a gift, call Keith, Jennie or B.J. at NWC ext. 5405 by close of business on May 25.

## Navy reserve force looks for veteran sailors

If you're a veteran and Naval Reserve. For more information on opportunities, call 446-4217.

## The Skipper Sez...

### QUESTION

**Military --** With the emphasis being placed on area access badges on Center, which all of us in the shop here agree is needed, why do we see so many people in the areas with cameras? We know on sight most of the legitimate photographers on base, but we still see a considerable amount of people taking pictures who have "P" passes. Do you feel the number of people who have "Ps" are too many?

### ANSWER

In addition to the employees we have on Center whose primary duty is photography, there are a number of employees whose duties regularly require the use of a camera; engineers and technicians need to obtain photographic evidence of test results, planners and estimators need photographs of construction sites and on-going construction, quality assurance evaluators need photographs of damage, etc.

To control the use of cameras, we have developed two types of "P" badges. For employees whose duties require frequent use of a camera, a "P" is placed in the upper left square of the four squares on the reverse side of their badge. Additionally, each department is issued a limited number of "special photographic passes," which may be issued to those employees who occasionally require the use of a camera. These passes look like a standard brown contractor badge, however, the picture is replaced by a large letter "P."

To obtain a "P" on an employee badge, a department level memo request and justification is required. I have designated the Center's Security Officer (Code 24) and Security Manager (Code 243) as approval authorities for these requests.

It is up to each of us to ensure that security is maintained at NWC. Any time a civilian or military employee of NWC observes anyone using a camera in a restricted area, they are obligated to ask to see authorization. If the photographer can not show authorization, the China Lake Police Division should be notified immediately at NWC ext. 3323.

Your concern is appreciated and is an example of how all NWC employees can work together to ensure our security.

### QUESTION

I have two questions on a security issue I would like to see addressed. We work in a secured area which requires a cipher lock on one entry and a keyed lock on the other entry. If we have a personnel change, does this require rekeying in addition to the combination change? Also, what is the policy if the combination to the cipher lock is given to an unauthorized person?

### ANSWER

A cipher lock combination is in essence the same as a traditional metal key. The combination allows the holder unescorted access in your area. The NWC key and lock control procedures require that each department establish positive key control procedures to ensure that keys are issued only to those employees with an operational need and that those keys are recovered when the need no longer exists. The same principle applies to combinations to cipher locks. However, the combination to a cipher lock can not be recovered and, therefore, must be changed when the individual who has the combination does not have a need for it.

In direction response to your questions, personnel changes do not require rekeying, provided the key is returned to the key custodian. If the key can not be recovered, rekeying is necessary. Area supervisors require the changing of cipher lock combinations whenever personnel changes occur. If a cipher lock combination is given to an unauthorized person, the security of your area has been compromised, and the combination should be changed. Further information is contained in NAVWPNCENINST 5510.29. Your concerns are appreciated.

All China Lakers, including military personnel, civilian employees and their dependents, are invited to submit questions to this column. Such queries must be in good taste and pertain to matters of interest to a large segment of the China Lake community. Answers to these questions are directly from Capt. Douglas Cook. Please call NWC ext. 2727 with your question and state whether you are a military member, civilian employee or dependent. No other identification is necessary. Since only three or four questions can be answered in the Rocketeer each week, anyone who would like to ensure getting an answer to a question may leave their name and phone number for a direct contact, but otherwise, this is not required. There is no intent that this column be used to subvert normal, established chain-of-command channels.

# Safe sun:

Clinic offers one method for determining how to avoid summer burns

An easy-to-use rule of thumb for safety in the sun: When your shadow is shorter than you are tall, the sun can burn, so cover up. This "shadow method" works anywhere and for all seasons.

The shadow method is based on the principle that the closer the sun comes to being directly overhead, the stronger are its burning ultraviolet (UV) rays. The atmosphere, and especially its ozone layer, absorbs most of the dangerous UV radiation from the sun, but the small amount that does reach the ground can cause sunburn around midday. During the summertime, most people can experience sunburn after 20 to 30 minutes of continuous sun exposure.

As the sun sinks in the sky in the afternoon, its increasingly slanted rays must pass through more and more air and ozone. By the time the sun reaches the point halfway between the zenith (overhead point) and the horizon, enough of the harmful UV rays are blocked for sunlight to be relatively safe

from causing sunburn. At that time, a person's shadow length on a level surface is equal to the person's height.

Sun-safety rules based on time of day may not be adequate because the relationship between clock time and the sun's distance from the zenith varies considerably with changes in season and geographical location. The shadow method eliminates these problems by permitting a person to determine, without a watch or other instrument, whether the sun's angle is in the danger zone. A person's foot can be used as a ruler for pacing off and estimating shadow length. In general, about six personal foot lengths are equal to a person's height.

For information about cancer prevention, call the Cancer Information Service at 1-800-4-CANCER, or write: Office of Cancer Communications, Building 31, Room 10A24, Bethesda, MD 20892. From, NWC Branch Medical Clinic: Reprinted from *Military Medicine* magazine, April 1990.

### Going to Sea

From the desert to the sea is the destination for me. I will be checking out from China Lake next month. I will be reporting for sea duty on board the *USS Detroit*, which is homeported in Earle, New Jersey in July. I will be where I believe the Master of the sea, Jesus Christ, wants me to deliver religious ministry.

Where have these 2 3/4 years gone? They have certainly gone by swiftly, too swiftly. I have enjoyed my duty here at the Naval Weapons Center. China Lake has come to have a special place in my heart. Thank you, the people of China Lake, for everything.

I am not one who is long on good-byes. I am not a "pomp and circumstance" kind of fellow. I would prefer to exit as quietly as I entered.

So, I would prefer to address the fact that I am going to sea. As aforementioned, I believe Christ wants me at sea. Through the Holy Bible, I hear Him calling me to minister to the officers, chiefs and sailors attached to the ship. I have dedicated myself to Him by serving His people in uniform.

I find much strength in Psalm 107:23-30 (NIV), which I submit for your consideration:

"Others went out on the sea in ships; they were merchants on the mighty waters. They saw the works of the Lord, his wonderful deeds in the deep. For he spoke and stirred up a tempest that lifted high the waves. They mounted up to the heavens and went down to the depths; in their peril their courage melted away. They reeled and staggered like drunken men; they were at their wits' end. Then they cried out to the Lord in their trouble, and he brought them out of their distress. He stilled the storm to a whisper; the waves of the sea were hushed. They were glad when it grew calm, and he guided them to their desired haven."

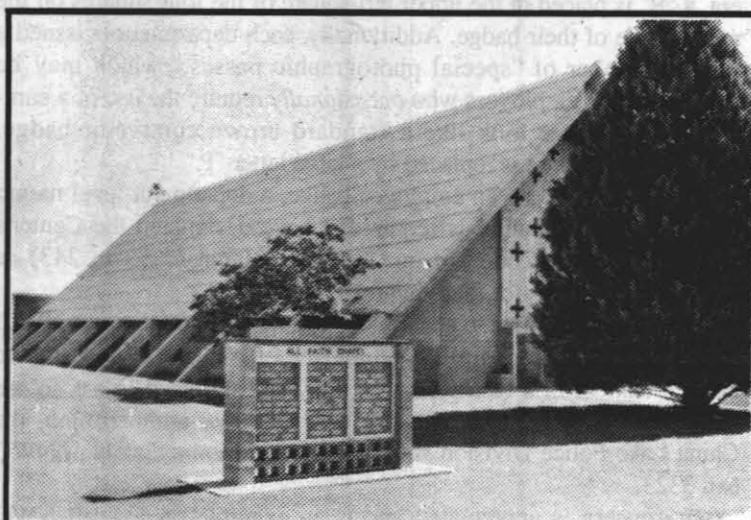

Thank you again people of China Lake. It has been great.  
By Lt. G.E. Williams, CHC, USNR  
Airfield Chaplain

## NRS providing valuable aid

World-wide, financial assistance to sailors, Marines, dependents and survivors from the Navy-Marine Corps Relief Society hit \$39.7 million last year.

There were 95,713 cases of financial assistance. Another 73,000 members and dependents received advice and counseling.

All this money came from donations and repaid loans. Without service members donations, and volunteer help, NRS couldn't provide all this help. Remember NRS needs help.

# GEHA rep visits Center June 11

Due to the interest expressed in having a Government Employees Hospital Association (GEHA) representative available for policy holders, Bob Johnson, a GEHA representative, will visit China Lake on June 11 from 7:30 a.m. to 4:30 p.m. He will be located in Room 114 at the NWC Training Center to current GEHA policy holders or previous policy holders with pending claims.

Several changes in GEHA policies this past year have raised numerous questions. Any GEHA policy holder who has concerns regarding these changes, needs forms or just has questions concerning GEHA policies should make time to see Johnson.

Since Johnson will not have computer access to look into accounts, people needing this service should call 1-800-821-6136.

## Petit advises students

Professor Petit of California State University, Northridge (CSUN) will be on Center June 13 to advise current and prospective students in the master's degree program in electrical engineering offered by the school.

Those wanting an appointment to see Professor Petit should call Helen at NWC ext. 2648.

# Thrift Savings Plan open season runs thru July 31

Open season for enrollment or change in election in the Thrift Savings Plan (TSP) will start May 15 and close July 31. Pamphlets are being distributed to all employees.

TSP is a plan that provides an employee with an opportunity to save money on a tax-deferred basis in order to supplement annuity benefits from the FERS Basic Benefit Plan and Social Security, or CSRS, if applicable. It is similar to a savings plan which is widely used in the private sector, called "401(K)."

Because of the advantages in participation in the TSP program, employees are encouraged to consider enrollment. The first advantage is that contributions are tax-deferred. For FERS employees, another great advantage is that the government will put in up to 5 percent of basic pay.

The TSP is the third part of FERS and a very

important part of future financial security. The government inputs one percent, whether or not the employee participates. Employees may contribute as little as one percent, or a fixed dollar amount under one percent, or a greater amount up to 10 percent of basic pay. The government will put in matching funds from 1 percent to 4 percent, depending on the amount of employee contributions, or up to a total of 5 percent.

CSRS employees may contribute up to 5 percent of basic pay, but the government does not contribute any matching funds. Keep in mind that the employee contribution is tax-deferred.

Employees who want to enroll or change their current election should contact their PMA. For further information, employees should call their PMA or Virginia Spille at NWC ext. 2592.

# Seafarer improvements

Management plans new activities, entertainment for faithful patrons

Reflecting patrons's wishes, changes are in store for the Seafarer Club.

Friday night dancing has taken a modern approach. A different D.J. each week will play something for everyone. Enjoy a variety of music in an adult environment.

While the "Laws of the Land" will still be enforced -- no one is allowed to procure or drink alcoholic beverages under the age of 21 and no one under 18 years of age may enter the Seafarer Club for evening events -- special non-alcoholic beers and "mocktails" will be available for patrons between the ages of 18 to 20 and people with a non-alcoholic lifestyle.

Special entertainment is also being arranged to keep patrons happy. England 402, a live rock band, will shake the rafters at the Seafarer Club on May 18 from 9 p.m. until 1 a.m. The cover charge is only \$3 per person.

Comedy Night, slated for June 13, is sure to make the audience roar with laughter. Los Angeles area professional comedians will

entertain guests beginning at 8 p.m. Admission is \$5 per person for advance tickets and \$6 per person at the door. To start the evening off right, enjoy a steamship round of beef buffet from 6 to 8 p.m. Cost for the diner is \$5.95 per person. The Seafarer Club staff urges patrons to

purchase tickets early so there will be adequate seating and enough food.

Beginning June 5, regular evening ala cart will be available Monday, Tuesday, Wednesday and Friday evenings from 5 to 8

p.m. Enjoy good food and a relaxing atmosphere at a low price.

After a scrumptious meal, diners might want to enjoy an after dinner drink in the Seafarer Club's lounge. The lounge is open Monday through Thursday from 4:30 to 11:30 p.m. and on Fridays from 3 p.m. to 1 a.m.

On Tuesday evenings, the Seafarer Club is the place to be for games. Party Bingo begins and 7 p.m., followed by regular Bingo at 8 p.m.

Increased interest in darts has produced dart boards in both the Chief Petty Officers' lounge and the Enlisted lounge. Rumor has it that team competition is forthcoming! Come on out and enjoy the fun!

Starting June 14, enjoy pool side dining and family fun at the Officers' Club during "Family Night," a summer event. Beginning at 6 p.m., take a cool dip in the pool and then enjoy a summer dining menu which should please the whole family. Remember, don't let the name fool you. While the event is geared towards family fun, you don't need a family to enjoy this event!

For additional information about the Seafarer Club, call NWC ext. 2581 or 446-6929. Daily specials, as well as all other events, are listed in the MWR Recreational Newsletter, the Roadrunner, which is distributed the beginning of each month on Center and is available at all MWR facilities.

Have an enjoyable summer at the Seafarer Club.

# CHAMPUS reforms a success

California initiative may expand into more Western states in summer

CHAMPUS Reform Initiative, the Department of Defense's pre-paid health care demonstration project in California and Hawaii, may expand to three more Western states this summer, a DoD health affairs official speculated.

Good reviews in a recent Rand Corp. study may mean the project's spread to Arizona, Nevada and New Mexico, although probably not before August, the official noted.

The demonstration project offers less expensive health care to patients who go to "preferred providers"—doctors and hospitals selected by a contractor. DoD pays the contractor, Foundation Health Corp., a fixed fee for providing the care. The project has two plans, one requiring enrollment called CHAMPUS Prime and a supplemental plan called CHAMPUS Extra.

California and Hawaii have some 865,000 beneficiaries, a number equal to 17 percent of the CHAMPUS population in the continental United States. Adding the 213,000 beneficiaries in the three

new states would bring the demonstration project population up to 20 percent of beneficiaries in the nation.

According to the Rand report, 97 percent of the beneficiaries in the demonstration projects were satisfied with the care they received. Results indicate the project saves money: CHAMPUS costs in California and Hawaii grew only 4.5 percent during the test period; costs in regular CHAMPUS-covered areas grew 17 percent. Claims costs in the demonstration areas actually declined 10 percent, but were offset by higher administrative costs that accompany managed care efforts. The biggest savings came in mental health services, the cost of which declined by what Rand termed "an astounding 34 percent." Mental health accounts for some 25 percent of CHAMPUS costs, so the finding is particularly good news, the DoD health official said.

Services under the demonstration project began Aug. 1, 1988; the Rand study covered the period from April 1 through June 30, 1989.

*I've heard about a new monitor for the Macintosh that will rotate between portrait and landscape displays. I have not seen one, is this available on the market yet?*

The monitor you are referring to is the Radius Pivot. The Pivot will indeed display a full page in both portrait and landscape orientations, with a resolution of 640 x 864 and 864 x 640, respectively. As its name implies, the Pivot can be rotated easily between positions. So, when you are finished using the word processor to create a letter in portrait position, you can simply push the Pivot on its side and view your spreadsheets in landscape orientation. This is a slick, real-time move that does not require the Macintosh to be rebooted.

The Pivot's standard equipment includes four levels of gray, with upgrades available to sixteen levels for near-photographic quality images. The upgrades provide an excellent quality for your graphics application requirements.

Both Mac II and Mac SE/30 interfaces are available for the Pivot and should be available as you read this.

**Reminder!!!**  
The software show is scheduled for next Thursday, May 24, from 9 a.m. to 2 p.m. at the Seafarer Club. IBM PC and Macintosh software products will be the featured attraction. Admission is free, so come on down!

By Bob Beane

## Radar patrols continue by CLPD

Motorists on board the Naval Weapons Center (NWC) are reminded that China Lake Police Division (CLPD) officers enforce state and NWC traffic regulations.

According to Kerry B. Swigum, traffic manager, CLPD Operations Branch, areas of concentration for radar traffic enforcement for next week are listed below.

- Monday -- Blandy Avenue.
- Tuesday -- Richmond Road.
- Wednesday -- Knox Road.
- Thursday -- Inyokern Road.
- Friday -- Blandy Avenue.

Violations may be cited at any time, as well as in areas other than the ones mentioned above.

## Secretarial opportunities

This column is used to announce secretary positions for which the duties and job relevant criteria are generally similar. Secretaries serve as the principal clerical and administrative support in the designated organization by coordinating and carrying out such activities. Secretaries perform numerous tasks which may be dissimilar. Positions at lower grades consist primarily of clerical and procedural duties and, as positions increase in grades, administrative functions become predominant. At the higher levels, secretaries apply a considerable knowledge of the organization, its objectives and lines of communication. Depending on grade level, typical secretary duties are implied by the job relevant criteria indicated below.

Applicants will be rated against four or more of the following job relevant criteria: (1) ability to perform receptionist and telephone duties; (2) ability to review, track, screen and distribute incoming mail; (3) ability to review outgoing correspondence; (4) ability to compose correspondence and/or prepare non-technical reports; (5) knowledge of filing systems and files management; (6) ability to meet the administrative needs of the office; (7) ability to train clerical personnel and organize workload of clerical staff processes; (8) ability to plan and coordinate travel arrangements; (9) ability to maintain and coordinate supervisor's calendar and to arrange conferences.

Unless otherwise indicated, applicants for branch secretary will be rated on elements 1/2/3/5/8; division secretary applicants will be rated on elements 1/2/3/4/7/8/9; Program Office secretary applicants will be rated on elements 1/2/3/4/5/8/9; and department secretary applicants will be rated on elements 4/7/8/9. A SUPPLEMENTAL FORM IS REQUIRED AND MAY BE OBTAINED IN ROOM 100 OF THE PERSONNEL BUILDING.

- No. 31-007, Secretary (Typing), DG-318-1/2, Code 3145 - The incumbent will provide secretarial and administrative support to the F/A-18 Test and Instrumental Branch. Knowledge of and experience on the Macintosh and with word processing software is desirable, but not required. Promotion potential to DG-2. The area of consideration for this position is limited to the 03 Directorate.
- No. 31-017, Secretary (Typing), DG-318-A/1/2, Code 3197 - The incumbent will provide secretarial and administrative support to the AH-1 Systems Engineering Branch. Knowledge and working skill on the Macintosh PC is desirable. Promotion potential to DG-2. The area of

## Reassignments...

(Continued from Page 17)  
is located in Code 64303, the primary technical manpower in support of the TARIF TMO. The incumbent will be required to support ongoing projects developing real time instrumentation and control software for electronic warfare training and test range systems. This person will develop microprocessor based software in support of RF Target projects, and electronic warfare training range projects. It is desired that applicants possess knowledge of MS-DOS, UNIX, and the C programming language. Must be able to show proof of, and maintain secret clearance. Promotion potential to DP-3, but not guaranteed. To apply, submit a current SF-171 to Mr. Ken Bailey, Code 6436, Building #31441.

No. 64-006, Interdisciplinary, (General/Mechanical/Aerospace Engineer/Physicist) DP-801/830/861/1310-1/2/3, Code 6411 - This position is located in the Design Section, (Code 64111), Systems Development Branch, Recovery Systems Division, Aerosystems Department. The incumbent's responsibilities will include the design, development, and test and evaluation of emergency and premeditated recovery systems for aircrews as well as retardation, stabilization and recovery systems for ordnance and missile systems. The work will primarily involve the design and development of textile parachute systems, but there will also be opportunities to work with other aerodynamic decelerator technologies. Additional tasks may include mechanical integration design with ejection seats, aircrew escape capsules, missile/ordnance systems, airdrop test vehicles and Navy test parachutists. Opportunities will be provided for formal and on-the-job training in the areas of textiles and aerodynamic decelerator technology. There will be substantial hands-on experience with design and testing of parachute systems. A familiarity with MacIntosh or other personal computer systems and basic knowledge of FORTRAN is desirable. Must be able to obtain and maintain secret level clearance. Promotion potential to DP-3, but not guaranteed. To apply, mail current SF-171 to Mr. Cal Kato, Code 6411, Building #3, Room 521.

No. 64-007, Interdisciplinary (General/Mechanical/Aerospace Engineer/Physicist), DP-801/830/861/1310-3, Code 6411 - This position is located in the Design Section, (Code 64111), Systems Development Branch, Recovery Systems Division, Aerosystems Department. The incumbent will be responsible for the design, development, and test and evaluation of airborne retarder systems dealing primarily with, but not limited to textile parachutes. The incumbent will coordinate program plans with sponsors at NAVAIR and other government facilities. The incumbent will perform feasibility studies and make recommendations for candidate retarder systems to meet project requirements. The incumbent will develop schedules, cost estimates, and resource allocation plans and monitor the progress to ensure project milestones are met. The incumbent will develop and coordinate proof-of-design test plans and will evaluate and assess test results. Must be able to obtain and maintain secret level clearance. Promotion potential to DP-3, but not guaranteed. To apply, mail current SF-171 to Mr. Cal Kato, Code 6411, Building #3, Room 521.

consideration for this position is limited to the 03 Directorate.

No. 31-018, Secretary (Typing), DG-318-2/3, Code 3110 - The incumbent will provide secretarial support services to the Advanced Systems Project office. A working knowledge of the MacIntosh computer and associated software is desirable. Ability to obtain and maintain a Top Secret clearance. Promotion potential DG-3. The area of consideration for this position is limited to the 03 Directorate.

No. 31-019, Secretary (Typing), DG-318-1/2, Code 3159 - The incumbent serves as Branch Secretary providing clerical support to the Systems Engineering Branch. Experience on the MacIntosh II is desirable. Promotion potential to DG-2. The area of consideration for this position is limited to the 03 Directorate.

No. 31-020, Secretary (Typing), DG-318-1/2, Code 3186 - The incumbent will provide secretarial support to the Susceptibility Analysis Branch. Knowledge of the MacIntosh PC is desirable. Must be able to obtain a secret clearance. Promotion potential to DG-2. The area of consideration for this position is limited to the 03 Directorate.

No. 31-021, Secretary (Typing), DG-318-1/2, Code 3185 - The incumbent will provide secretarial support to the Endgame Analysis Branch. Knowledge of the MacIntosh PC is desirable. Must be able to

obtain a secret clearance. Promotion potential to DG-2. The area of consideration for this position is limited to the 03 Directorate.

No. 31-022, Secretary (Typing), DG-318-2/3, Code 3103 - This position is located in the A-H1/AV-8B Program Office, Aircraft Weapons Integration Department. The incumbent will provide secretarial support to the A-H1 Project Manager and Code 3103 staff. Knowledge of MacIntosh and IBM computers is desirable. Promotion potential to DG-3. The area of consideration for this position is limited to the 03 Directorate only.

NO. 39-005, SECRETARY (TYPING), DG-318-1/2, CODE 3951 - This position is located in the Special RF Technology Branch, RF Guidance Division, Intercept Weapons Department. The incumbent provides secretarial support to the branch. Experience with the Macintosh II desired, but not required. Promotion potential is to DG-2, but not guaranteed. AREA OF RECRUITMENT/CONSIDERATION IS LIMITED TO LABORATORY DIRECTORATE (03)

NO. 39-007, SECRETARY (TYPING), DG-318-2/3, CODE 39B10 - This position is located in the Sidewinder Project Office. The incumbent is the Lead Secretary and provides secretarial and administrative support to the Technical Manager and Project staff. Experience with the Macintosh is desired, but not required. Promotion potential is to DG-3, but not guaranteed. AREA OF RECRUITMENT/CONSIDERATION IS LIMITED TO LABORATORY DIRECTORATE (03).

NO. 39-008, SECRETARY (TYPING), DG-318-2, CODE 39B10 - This position is located in the

# China Laker earns county volunteer honor

Don't ask Dan Banks why the Kern County Volunteer Center named him their Public Safety Volunteer of the Year last month, he still isn't sure. And don't ask him how he has come to be committed to so much good with so many volunteer organizations, he'll say there is no ready answer to that question either.

Whatever the reasons, the mechanical engineering technician in Components Development Branch of the Ordnance Systems Department, volunteers vast amounts of time and effort to more than a dozen organizations and causes, ranging from the Association of Retarded Citizens to the American Red Cross and from local PTA to the March of Dimes.

**Dan Banks**

Many of the organizations Banks donates his time and energy to are oriented toward children and prevention. "A lot of my stuff is centered on helping kids," he said. Citing tasks such as poison prevention, bicycle safety clinics, the 'Walk America' event for the March of Dimes and disaster preparedness in schools, the long-time China Laker says he really

enjoys seeing kids benefit from the work. Prevention and preparedness are important factors for Banks. It is important to him that efforts go forward on seeking to

prevent birth defects, to making the home a safe place for children and families taking the time to prepare themselves and

their home for possible disasters ranging from earthquakes to flooding. In the decade ahead, Banks feels prevention is the real key to an improved society. Better pre-natal care helps prevent birth defects. Better instruction in parenting skills helps prevent child abuse, better teaching about household hazards helps prevent home accidents, and the list goes on. All of this prevention makes a difference in a healthy society.

Banks is an example of how one person can make a difference. He notes there was no organizational structure in the Indian Wells Valley for the Poison Prevention campaign undertaken this year. But he knew where to get information and proceeded to set up informational displays in the community. If even one childhood poisoning incident is prevented through this educational work on his part, it's all worthwhile.

Modest by nature, Banks hopes the recognition, such as he got from the Volunteer Center, encourages other individuals to make a volunteer commitment. While

one person can make a difference, it often takes the collective effort as part of an organization to make everything work just a little better. As a volunteer, Banks notes

"I hope to show kids there are advantages to becoming a volunteer."

you have a chance to meet people with similar interests and goals. You find out you're not the only one who cares.

His wife, Cathy, and daughter, Christine, give him lots of support and understanding when it comes to this load of volunteer activities he has undertaken. In fact, they knew all about the award long before he was surprised at the annual Volunteer Center banquet.

"I hope to show kids there are advantages and benefits in becoming a volunteer. There is more to making a contribution than just saying no to drugs. You can say yes to volunteering and say yes to helping others. Anyone interested in becoming a volunteer in the Indian Wells Valley can call the IWW Volunteer Center, a United Way agency, at 375-9662.

# CLPD says nation faces epidemic of missing kids

China Lake Police Division personnel have issued a reminder to parents and children about the nationwide epidemic of missing children.

The epidemic is one of grave concern in this country. Most children are missing due to running away, parental or stranger abductions. When we hear about missing children, we are confronted with unacceptable and unpleasant aspects of our society, such as; murder, sexual abuse, exploitation, physical abuse, neglect and dysfunction of the family.

Some children are missing by their own choice and are known as "voluntary missing" or run-aways. Over a million such children disappear each year. Many return home after a short period to time, while others remain at large. Often these kids know what they are running from, but not what they are running to. Some want to be "grown up" and do things their way, rebelling against family rules; others are running from abusive families. Many lack the survival skills needed to be on their own, thereby making themselves vulnerable to those who choose to exploit them. Many missing children

become victims of crime, then later in order to survive, become perpetrators themselves. Thus, a cycle develops which can be difficult to break. Runaways account for the largest group of missing children in this country.

Many missing children and most abducted children are taken by relatives, usually one of their parents. These cases are known as "parental abductions", "parental kidnapping", "child stealing" or "involuntary missing." Most of these children are under the age of seven when taken. That account form 100,000 to 625,000 missing children

annually. Children are usually stolen by the non-custodial, in an act of revenge against the ex-spouse, using the children as a weapon.

To assume the children are safe because they are with an abducting parent is a complete misconception. Most deaths of children under the age of six are a direct result of parental neglect or abuse.

Parentally kidnaped children are often taken out of revenge and forced to live like fugitives, frequently denied proper education and medical care. Although they may at first long to return home,

they will often be told the other parent no longer loves them or has died. Such children may learn to identify with the abductors and suffer impaired development.

"Stranger abductions" and "non-relative abductions" are proportionately the greatest risk of life-loss of any missing group. Estimates on the number of "stranger abductions" each year range from 4,000 to 20,000. Some of these children are abused in one of more of the following ways: sexual abuse, prostitution, pornography, assault and murder.

# Tech Library back in laboratory compound

(Continued from Page 1)

Library's services inside the Michelson Lab compound.

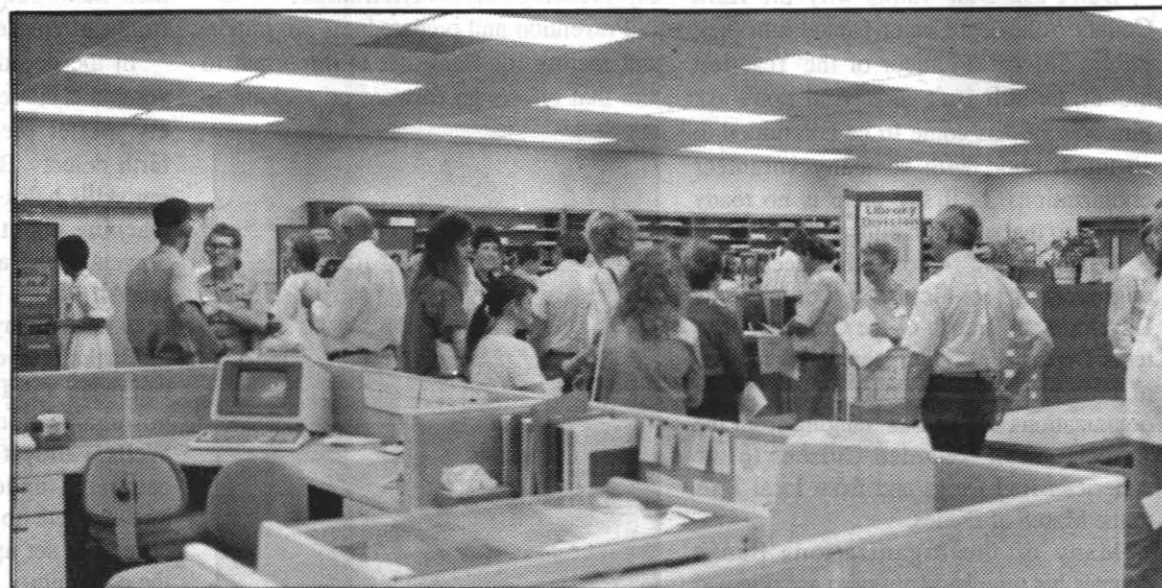

"Research cannot be adequately pursued without a strong avenue to information materials. I am confident the people and materials we have here in the Technical Library will continue to be a viable asset for the RDT&E community," concluded Porter.

According to Coraggio, the major thrust of the Technical Library in the next year will be projecting for future users and future needs, identifying information technology to meet these needs, and most importantly, strengthening their commitment to the user. "We are identifying our current users and the information services they need, she said, "and we realize that it may not be the same things they wanted 10 years ago. The Technical Library needs you, the customer, to tell us the direction we should go.

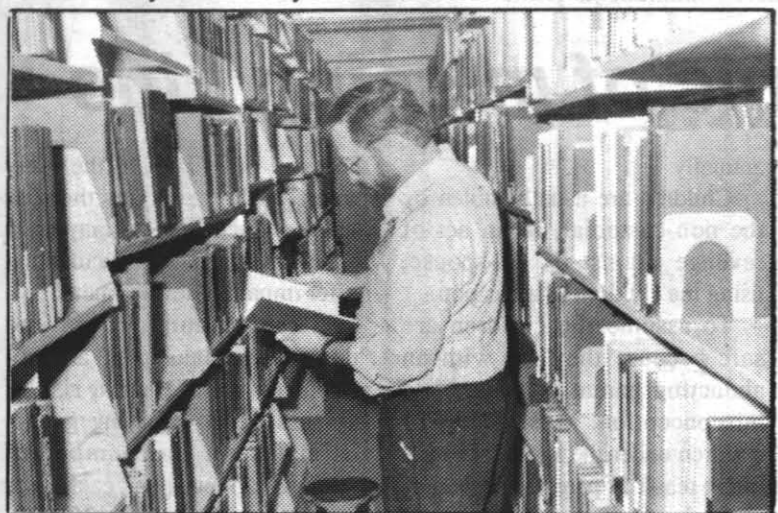

"Good innovative ideas are generated from several sources -- the work environment, the accurate analysis and understanding of our patrons and the firm commitment to excel," she added. "Excellent services require an interactive relationship between the librarian and customer....Are we giving you, our customer, what you come for?"

Following the ribbon cutting ceremony, Technical Library staff members gave a tour of the circulation department and explained some of their resources. Afterwards, vans took participants to the Research Service Center and the Center Library for a tour of these facilities.

People who would like to know more about the Technical Library and the many services they offer should call NWC ext. 1300.

**LEARNING THE ROPES--**More than 50 guests and patrons attended the opening of the Technical Library's new home last Tuesday. After the ribbon cutting, visitors were invited inside to browse through the library (above) and to observe the many services the library offers. In the photo on the left, Sterling Haaland looks through one of the library's research books. In addition to the main building and Research Service Center, both of which are located within the Michelson-Laboratory compound, the library has two other offices -- the Technical Services Branch is located at 115 Hussey and Inyokern roads and the main offices are located at 114 Bard Street.

## Reassignment opportunities

This column is used to fill positions through reassignment only. For this reason, the Reassignment Opportunity Announcements are separate from the Promotion Opportunities column in the Rocketeer. Applications will be accepted until the date stated in the announcement. Employees whose work history has not been brought up to date are encouraged to file an SF-171 or 172. All applications must meet minimum qualification requirements established by the Office of Personnel Management. Information concerning the recruitment and placement program and the evaluation methods used in these reassignment opportunities may be obtained from Personnel Management Advisors (Code 096 or 097). Applications should be filed with the person whose name is listed in the announcement. The Naval Weapons Center is an Equal Opportunity Employer.

**No. 30-003, Interdisciplinary General/Mechanical/Electronics/Aerospace Engineer/Physicist/Operations Analyst/Mathematician, DP-801/855/861/1310/1515/1520-3, Code 308** - This position is located in the Weapons Planning Group, Coordinated Warfare Group.

The incumbent will act as Scenario Team Leader leading a team of Navy laboratory participants including a core group within Code 30. Responsible for the development and publication of scenarios reflecting future Navy missions for OPNAV, SPARWAR and specific NWC programs. Familiarity with Navy missions and naval operations required. Working knowledge of intelligence and the Navy Intelligence system highly desirable (current SBI required). Experience with methods of operations analysis helpful. Must be able to direct work of a group of people. Requires the ability to maintain inter-

face with OPNAV and Fleet, as well as with the Navy technical and intelligence communities. To apply, send updated SF-171 to Larry Lincicum, Code 308, NWC ext 3811. The area of consideration for this position is limited to the 03 Directorate only.

**No. 64-004, Computer Scientist, DP-1550-2/3, Code 6436** - This position is located in Code 64303, the primary technical manpower in support of the TARIF TMO. The incumbent will be required to develop in-house software engineering expertise in the complex TACTS environment. This person will lead and participate in both in-house and contracted

efforts to upgrade the TACTS computer systems and applications software. A familiarity with computer science, electrical engineering, physics, or mathematics is needed. It is desired that applicants possess knowledge of FORTRAN programming and disciplined software development. Must be able to show proof of, and maintain secret clearance. Promotion potential to DP-3, but not guaranteed. To apply, submit a current SF-171 to Mr. Ken Bailey, Code 6436, Building #31441.

# Job opportunities available at NWC

(Continued from Page 15)  
 inspection will be in compliance with all established regulations. Must be able to obtain and maintain a secret level clearance. Must be able to pass an annual physical examination for an Explosive Driver's license. Applicants must include a supplemental statement which addresses the job elements required. Copies of the supplemental application are available from Room 100 in the Human Resources Department, 505 Blandy. Failure to submit the supplemental may result in being disqualified.  
**Job Relevant Criteria:** Ability to do the work of the position without more than normal supervision; skill in use of material handling equipment and techniques; ability to interpret instructions, documents, etc., including DoD regulations governing the shipping and storage of ordnance; knowledge of ordnance and explosives; dexterity and safety, including skill in detecting potential ordnance hazards. Promotion potential to WG-7.

**No. 62-005, Interdisciplinary (Supervisory General/Mechanical/Electrical/Electronics/Aerospace Engineer) DP-801/830/850/855/861-3/4, Code 6211-**This position is Head, Ballistics Test Branch, Ordnance Test and Evaluation Division, Range Department. This branch operates and maintains Navy's most complete static test complex for solid rocket motor testing. This Skytop complex has the capability for static testing of a complete range of solid propulsion systems from the smallest experimental devices to live all-up strategic systems. The branch provides complete support for all tests, including the design and fabrication of specialized test hardware and instrumentation, data acquisition and processing, camera/video sup-

port, and real time radiography. The branch also operates aero-heat test facilities for testing Ramjet motors and other missile components by simulating the flow rates, high temperatures, and pressures encountered in supersonic flight.  
**Job Relevant Criteria:** Knowledge of testing and evaluation of solid rocket motors, including test set up/tooling, instrumentation, ordnance safety, and program management; knowledge of rocket motor design and propulsion systems; ability to deal effectively with diverse groups; knowledge of NWC personnel policies and procedures; knowledge of and a willingness to support NWC EEO policies and goals. Promotion potential to DP-4, but not guaranteed. Subject to completion of 1 year supervisory probationary period if not previously completed.

**No. 62-006, Electronics Technician, DT-865-2/3, Code 62544 (multiple vacancies)-** This position is located in the Range Communications Section of the Range Support Branch, Data Systems Division, Range Department. Incumbent will install, maintain, and operate electronic communications equipment. Incumbent will work closely with engineering personnel in the design, operation, and development of electronic communications systems.  
**Job Relevant Criteria:** Ability to develop and interpret schematics and engineering drawings; ability to troubleshoot digital and/or analog circuits; skill in installation, maintenance, and repair of electronics equipment; knowledge of telecommunications equipment and systems; ability to analyze technical data. Promotion potential to DT-3.

**No. 62-007, Electronics Technician, DT-856-2/3, Code 62361 -** This position is located in the T-9 Section of the Radar

Branch of the Instrumentation Systems Division of the Range Department. Incumbent will fabricate, operate and maintain North Range radars and video theodolite systems used for missile and aircraft testing on NAVWPNCEN North Ranges. Incumbent will work with radar transmitters and solid state receivers for pulsed tracking radar systems as well as working on video theodolites subsystems, video cameras and computer controlled devices. Outdoor working conditions and overtime may be required.  
**Job Relevant Criteria:** Knowledge of digital and/or analog circuit design; ability to troubleshoot digital and/or analog circuits; knowledge of radar and radar systems; ability to communicate orally; ability to communicate in writing. Promotion to DT-3, but not guaranteed.

**No. 62-008, Photographer (Sci-Tech), DT-1060-2, Code 62142 -** This position is located in the Photo Section of the Warhead Test Branch, Ordnance Test and Evaluation Division, Range Department. Duty is to participate in a variety of photographic test coverage. Complexity of tasks vary from ultra high-speed photography to project presentation and may require modification of equipment to accomplish desired results. Duties also include scientific motion picture, video, studio work, black and white, color printing, still photography and analytical assessment and editing.  
**Job Relevant Criteria:** Knowledge of high-speed, scientific and engineering photography; knowledge of photographic equipment; knowledge of photo-optical and electro-optical systems used in gathering field test data; ability to align and test electro-optical systems. Promotion potential to DT-3.

# Live fire test brings special honor to team

Engineers and technicians assigned to the Survivability and Lethality Division (Code 318) recently received a Special Act Award for their dedication and successful completion of the first congressionally mandated Live Fire Test (LFT) program ever conducted. Recognized for their achievements were Gary R. Burgner, project manager; Mikal O. Gray, firing office; Wayne H. Geyer, Robert F. Lyons and James R. Duzan, test engineers; Donald E. Watke, instrumentation lead; Jay R. Kovar, range engineer; and Daniel L. Zurn, photo documentation.

The live fire test was to determine the ability of the Advanced Medium Range Air to Air Missile (AMRAAM) warhead to produce an aircraft fuel ingestion kill. Legislative requirements mandated the Air Force complete this test before the Defense Acquisition Board Milestone IIIB decision point for high volume production of the AMRAAM missile.

According to Richard (Tim) Horton, the division head, the Naval Weapons Center was requested, and subsequently designated, as the primary test site for the

AMRAAM LFT due to its unique test facilities and engineering capability of the Survivability and Lethality Division's personnel.

The test presented a unique set of challenges due to its complexity and demanding schedule, noted Horton. "Under normal circumstances," he said, "a test of this type would require nine to 12 months. We only had six months to plan, conduct and document the test program." Horton explained that while this schedule was dictated by the director, Live Fire Test, Air Force personnel didn't feel it could be done.

Tests were conducted in a three-phase approach which required intense interaction between the Survivability and Lethality Division, the Joint System Program Office (JSPO) at Eglin Air Force Base and the secondary test facility at Wright-Patterson Air Force Base, Ohio.

In the letter nominating the team for the award, Horton said the test team was presented with numerous technical challenges, such as overcoming limited target data relating to systems operation, achieving repeatability in firings of AMRAAM

warhead fragments from a 30mm smooth-bore gun, maximizing the degree of realism in the test by providing a nominal target with its engine operating at a representative flight condition under airflow, and working in an unusually stressful security environment.

"The team met all challenges head-on and the final test was completed on schedule at NWC on Aug. 31," said Horton. "The test was deemed a complete success by the JSPO and OSD Live Fire Test Office personnel who witnessed the test."

"It is particularly noteworthy that the effort conducted by the Code 318 personnel was completed within an extremely aggressive schedule and significantly under budget," Horton further explained. "This achievement can only be attributed to the personal dedication and professionalism demonstrated by each of the team members while working many hours of overtime to ensure accomplishment of a near impossible task. This first LFT program is expected to provide a model for future life fire tests throughout the Department of Defense."

In addition to the Special Act Award, team members received a letter of appreciation from AMRAAM program director, Brig. Gen. Charles E. Franklin, USAF. The letter read, in part, "I would like to extend my personal appreciation to the personnel of NWC/Code 318 for exceptional support in the completion of Phase I of the AMRAAM Live Fire Test Program. Through your efforts, we were able to prove the lethality of AMRAAM beyond a doubt. . . You have set the example for all future live fire test programs to follow."

Brig. Gen. Franklin personally thanked Burgner, Lyons and Geyer for their superior efforts in developing and evaluating all of the Phase I tests and Gray for his exceptional performance as firing officer.

"Their contributions have greatly enhanced the reputation of the Survivability and Lethality Division, the Naval Weapons Center and the Navy with senior representatives of the Air Force and OSD, and contributed significantly to the AMRAAM Program by ensuring that a major program milestone was met," the nominating letter concluded.

### Today in Navy history

May 18, 1798--It was on this day in U.S. Navy history that President John Adams appointed Benjamin Stoddert as the county's first Secretary of the Navy. Stoddert quickly set up a powerful fleet which successfully countered French vessels in American waters during the "quasi-war" with France. During his term, Stoddert revitalized the Marine Corps and expanded construction of docks and naval yards. Today, the guided missile destroyer, *U.S.S. Benjamin Stoddert* (DDG 22), carries on his tradition of excellence from its homeport of Pearl Harbor.

### Try for free tickets

Wet 'n Wild, the only water park on the Las Vegas strip, are giving away free tickets to three lucky active duty military personnel this summer. The first drawing will be held May 31. To enter the drawing, simply send in a postcard with your name, rank or rate, address and phone number to Recreation Services, Commander (Code N4), Naval Base, Wet 'n Wild Give-away, 937 North Harbor Drive, San Diego, CA 92132-5100.

**DEDICATION AND WORK PAYS OFF--**Engineers and technicians in the Survivability and Lethality Division recently were honored with a Special Act Award. Capt. Douglas W. Cook, NWC Commander, congratulates (left to right) Don Watke, Jim Duzan, Mike Gray, Wayne Geyer, Jay Kovar, Robert Lyons and Gary Burgner for completing the test within an aggressive time schedule.

# Drug-Free Workplace testing starts in June at NWC

In accordance with the Department of the Navy Drug-Free Workplace Program, the Naval Weapons Center will begin drug testing in June. Therefore, the Employee Management Relations Division is re-issuing the following General Notice of Implementation to assure all employees are notified of the program.

Anyone who has any questions regarding this subject, should call Dan Burnett at NWC ext. 2592/3892.

General Notice of Implementation  
 Department of the Navy  
 Drug-Free Workplace Program  
 To Department of Navy Civilian Appropriated Fund Employees:

1. On 15 September 1986, (former) President Reagan signed Executive Order 12564, establishing the goal of a Drug-Free Federal Workplace. The Executive Order made it a condition of employment for all Federal employees to refrain from using illegal drugs on or off-duty. The Department of the Navy Drug-Free Workplace Program, developed to implement the order, is designed to accomplish these goals through deterrence, identification, rehabilitation and personnel action. While the Department of the Navy (DON) will assist employees with drug problems, it must be recognized that the employees who use illegal drugs are primarily responsible for changing their own behavior and actions.

2. Illegal drug use by any civilian employee of the DON is incompatible with the maintenance of high standards of conduct and performance. Moreover, illegal drug use could adversely affect personnel safety, risk damage to government and personal property, and significantly impair day-to-day operations. The DON program is aimed at identifying illegal drug users in order to maintain a safe, secure workplace and efficient DON operation.

3. The determination that an employee uses illegal drugs may be made on the basis of direct observation, a criminal conviction, the employee's own admission, other appropriate administrative determination or by a confirmed positive urinalysis. The program subjects all civilian appropriated fund employees to drug testing (urinalysis) under the following conditions:

- a. When there is a reasonable suspicion that the employee uses illegal drugs.
- b. As part of an authorized examination regarding an accident or unsafe practice.

c. As part of or as a follow-up to counseling or rehabilitation for illegal drug use.

4. In addition, certain employees occupying specifically designated sensitive positions within DON, will be subject to random drug testing. These are called Testing Designated Positions.

a. Employees in this category will receive individual written notices that their positions have been included in the activity random testing pool at least 30 days prior to actual testing.

b. Employees selected for or otherwise placed in a designated sensitive position, will be subject to a drug test prior to final selection/placement and to random testing thereafter.

c. Any employee can volunteer for random testing and will be included in the activity random testing pool.

5. All employees subject to testing shall be allowed to provide urine specimens in private except when there is reason to believe the specimen will be altered. Employees will be given the opportunity to declare the legitimate use of over-the-counter or prescription drugs prior to taking a test. The DON has developed strict chain-of-custody procedures to ensure proper identification of the specimen tested.

6. All urine specimens will be tested in DON laboratories or approved contract laboratories in accordance with mandatory guidelines published by the Department of Health and Human Services on 11 April 1988 in the

Federal Register. A two-step procedure has been established for testing urine specimens. The first test procedure used is called a radioimmunoassay (RIA) test and is used as an initial screening test. If the results of that procedure are positive, a second, confirmatory procedure is used called a gas chromatography-mass spectrometry (GE/MS). The screening levels of these tests are sufficiently high to eliminate extraneous reasons for a positive test and with confirmation by the second, but difference test method, the chemical test results are highly reliable and accurate. A medical Review Officer (MRO) will review all positive test results. Employees will be given an opportunity to provide evidence to an MRO for verification of the legitimate use of over-the-counter or prescription drugs authorized by a physician or medical officer.

7. Drug test results will be handled in a confidential manner. Positive test results from the laboratory will only be disclosed to a Medical Review Officer. Positive results, verified by the MRO, may only be disclosed to the employee, the appropriate Civilian Employee Assistance Program (CEAP) Administrator, and appropriate supervisory/management officials necessary to take and process an administrative and/or adverse action against the employee, in an administrative proceeding \*such as appeals and grievances) or in a court proceeding.

8. The Navy cannot tolerate

the use of illegal drugs and we encourage any employee who has a substance abuse problem to seek assistance through his/her activity Civilian Employee Assistance Program. Such assistance may be obtained by contacting the activity CEAP Administrator. Employees who voluntarily identify themselves to their supervisor or their appropriate management official as users of illegal drugs, prior to being so identified by other means, and who seek counseling and/or rehabilitation assistance will not be subject to disciplinary action for their prior drug use. This is referred to as "safe harbor." It is important to note that once an employee is officially informed of an impending drug test, the employee is no longer eligible for "safe harbor." All employee medical and rehabilitation records maintained in connection with the CEAP Program will be deemed confidential "patient" records and may not be disclosed without the prior writ-

ten consent of the employee.

9. All employees are expected to refrain from drug use and participate in the testing program. Disciplinary action up to and including removal from Federal service will be initiated for the first failure to remain drug-free or refusal to submit to a drug test. Removal action will be initiated for any employee upon a second positive test result, failing to refrain from illegal drug use after counseling and/or rehabilitation, or adulterating or substituting a specimen.

10. This is a general notice to all employees that the Navy intends to implement a drug testing program. Actual testing by the activity/command will begin no sooner than 60 days from the date this notice is issued by the local activity/command. This notice is intended to provide general information on the DON drug testing program.

By William L. Ball, III  
 Secretary of the Navy

# Personnel News & Notes

## Promotional opportunities

Applications for positions listed below are being accepted from Department of Navy employees currently working at NWC and from eligible employees of attached activities who are permanently assigned to NWC. This group includes employees with career or career conditional appointments; employees with permanent Veterans Readjustment Act (VRA) appointments; temporary employees with reinstatement eligibility; and handicapped employees with Sch. (A) continuing appointments. Also included are spouses, with competitive status, of civilian sponsors hired by a DOD activity within NWC's commuting area. Applications from other groups will be accepted when specified in an advertisement. Vacancies are subject to restrictions imposed by the DOD Priority Placement Program. Applicants must meet all legal and regulatory requirements, including minimum qualifications requirements, by the closing date of the advertisement. Evaluation of applicant's qualifications will involve using at least two assessment measures. Assessment measures are work experience, annual performance assessment rating and narrative, education, training, performance assessment and awards.

Eligible spouses (of military sponsors) with competitive employment status may apply for employment preference. Those enrolled in this program will automatically receive consideration for employment on vacancies for which they applied. For initial employment information, career counseling and enrollment, call 939-3317 for an appointment.

**HOW TO APPLY:** Submit the following: a current application, SF-171 or other Human Resources Department pre-approved form; a copy of your most recent annual performance assessment narrative (note: a copy of your performance plan should be attached if the annual performance narrative description does not clearly state the tasks/duties performed); and a completed Background Survey Questionnaire. A supplemental narrative which relates your qualifications to each knowledge, skill or ability (KSAs) as cited in the advertisement is always desirable and may be required if stated in the vacancy announcement. Write the title, series, level (grade), and announcement number on all application materials. Not submitting the annual performance narrative may adversely affect your evaluation scores. Prior to submitting your application, complete Cover Sheet Form 12335/2, available at the reception desk. Make sure your address, phone number, etc. are current, correct and that all forms are complete and accurate. If information is missing, your qualifications may not be fully and completely rated. Additional information cannot be submitted after the closing date of the announcement. A current date and a signature on the last page completes the application. Civilian Spousal Program Eligibles with competitive employment status must submit a copy of their sponsor's PCS orders with each application in order to be considered for Merit Promotion vacancies which do not state that status eligibles may apply.

Application materials are accepted, and blank forms are available, at the Reception Desk, Room 100, Human Resources Department, 505 Blandy. Announcements close at 4:30 p.m. on Friday, one week after the opening date of the announcement, unless otherwise specified. Applications received after 4:30 p.m. on the closing date will not be considered. Copies of Applications may be submitted since applications are kept in an announcement file and cannot be returned or filed in personnel folders. The Naval Weapons Center is an Equal Opportunity Employer; selections are made without discrimination for any non-merit reason.

No. 31-023, Interdisciplinary Supervisory (General/Electronics Engineer/Mathematician/Physicist/Computer Scientist), DP-801/855/1520/1310/1550 - 3/4, Code 3145 - This position is that of Branch Head, F/A-18 Test and Instrumentation Branch, System Integration and Evaluation Division, Aircraft Weapons Integration Department. The F/A-18 Test and Instrumentation Branch is responsible for designing, testing and instrumentation of subsystems used in support of the F/A-18 aircraft. **Job Relevant Criteria:** Knowledge of subsystems used in support of F/A-18 aircraft including, physical systems and avionics, system design, operational software development, testing, analysis and instrumentation techniques; knowl-

edge of affirmative action principles including a willingness to implement EEO practices; ability to influence and motivate others; ability to perform as a first-line supervisor. The selectee may be required to serve a one year supervisory probationary period. The area of consideration for this position is limited to the 03 Directorate.

No. 31-025, Supervisory Computer Specialist, DP-334-3/4, Code 3145 - This position is that of Branch Head, F/A-18 Test and Instrumentation Branch, System Integration and Evaluation Division, Aircraft Weapons Integration Department. The F/A-18 Test and Instrumentation Branch is responsible for designing, testing and instrumentation of subsystems used in support of the F/A-18 aircraft. **Job Relevant Criteria:** Knowledge of subsystems used in support of F/A-18 aircraft including, physical systems and avionics, system design, operational software development, testing, analysis and instrumentation techniques; knowl-

edge of affirmative action principles including a willingness to implement EEO practices; ability to influence and motivate others; ability to perform as a first-line supervisor. The selectee may be required to serve a one year supervisory probationary period. The area of consideration for this position is limited to the 03 Directorate.

No. 31-016, Clerk-Typist, DG-322-A/1, Code 3113 - This position is located in the F/A-18 Sensors Facility Branch, Avionic Facilities Division, Aircraft Weapons Integration Department. The incumbent provides general office support; participates in security and control of access to restricted areas; assists in control of plant account inventory; and assists in the Branch reference library. Must be able to obtain a Secret clearance. Experience with personal computers desirable. Promotion potential to DG-1. The area of consideration for this position is limited to the 03 Directorate.

No. 34-003, Writer/Editor (Printed Media), DA-1082-1, Code 3413 - This position is open to current 03 employees only. This position is located in the Electronic Publishing Branch, Publications Division, Technical Information Department. The incumbent writes and/or edits technical and administrative reports, articles, and brochures; coordinates phases of the publication process; gathers and organizes technical information; and uses electronic word processing equipment. **Job relevant criteria:** Ability to interface effec-

tively with all levels of Center personnel; ability to analyze data; ability to gather and organize technical information; knowledge of publishing techniques; and skill in writing and editing. Promotion potential to DA-3 but not guaranteed.

No. 34-004, Publication Systems Specialist, DA-1001-1, Code 3413 - This position is open to current 03 employees only. This position is located in the Electronic Publishing Branch, Publications Division, of the Technical Information Department. The incumbent will be the primary system administrator and be able to carry out the day-to-day operation for an Interleaf publishing system, a Shaftstall disc converter, and a Linotronic 300 typesetter. The incumbent must also be familiar with other word processing equipment and be able to train other employees in the usage of equipment and matters of style in publishing. **Job relevant criteria:** Ability to deal effectively with all levels of Center personnel, contractors, and vendors; ability to analyze data; an understanding of a wide variety of software programs; maintain expertise in Navy and DOD printing regulations and procedures along with an understanding of distribution rules and regulations. Promotion potential to DA-2.

No. 34-005, Supervisory Library Technician, DG-1411-3/4, Code 3431 - This position is open to current 03 employees only. This position is located in the Information Services Branch of the Library Division, Technical Information Department. Duties and responsibilities consist of supervisory and functional work assignments including supervising circulation personnel located in the Technical Library and in the Research Service Center; assisting in development and implementation of circulation and loan procedures for the Integrated Online Library System (IOLS); training circulation employees; scheduling and reviewing work assignments; keeping Branch Head informed of developments affecting branch operations. **Job relevant criteria:** Knowledge of the library collection, circulation functions and services; ability to apply standard library methods and procedures to the service needs of the Technical Library; ability to deal effectively with all levels of NWC personnel and contractors; ability to communicate effectively both orally and in writing; ability and willingness to support NWC EEO policies and goals. Selectee must serve a one-year supervisory probationary period if not previously completed. Promotion potential to DG-4.

No. 39-006, Security Clerk (Typing), DG-303-1/2, Code 39404 - This position is located in the Technology Office of the Electro-Optics Guidance Division, Intercept Weapons Department. The incumbent is responsible for assisting in the day to day operations of the office in a variety of area such as record management, security management, and administrative support. **Job Relevant Criteria:** Ability to communicate orally; Ability to communicate in writing; Ability to deal effectively with people.

Incumbent must be able to obtain a Top Secret Clearance based on a background investigation. Promotion potential to the DG-3, but not guaranteed. **AREA OF RECRUITMENT/CONSIDERATION IS LIMITED TO LABORATORY DIRECTORATE (03).**

No. 39-009, Administrative Officer, DA-341-1/2, CODE 39404 - This position is located in the Technology Office of the Electro-Optics Guidance Division, Intercept Weapons Department. The incumbent provides detailed and comprehensive security administration for classified DOD research and development efforts. Duties also include contract data management, and financial tracking and analysis. Travel will be required. **Job Relevant Criteria:** Knowledge of security procedures and requirements; Knowledge of Navy contractual procedures; Knowledge of Navy accounting system; Ability to deal effectively with all levels of NWC personnel, sponsors and contractors. Incumbent must be able to obtain a Top Secret Clearance. Promotion potential to DA-3, but not guaranteed. **AREA OF RECRUITMENT/CONSIDERATION IS LIMITED TO DEPARTMENT 39 PERSONNEL.**

No. 39-010, Clerk Typist, DG-322-1, CODE 39B10 - This position is located in the Sidewinder Project Office, Intercept Weapons Department. The incumbent provides clerical assistance such as: preparing travel orders, filing, miscellaneous typing and telephone duties. Promotion potential to DG-2, but not guaranteed. **Job Relevant Criteria:** Knowledge of NWC travel procedures; Knowledge of NWC and Code 39 filing and correspondence procedures. **AREA OF RECRUITMENT/CONSIDERATION IS LIMITED TO LABORATORY DIRECTORATE (03).**

No. 61-001, Warehouse Worker (Ordnance), WG-6907-5/7, Code 6142 (multiple vacancies) - This position is located in the Ordnance Control Branch of the Ordnance Division, Aircraft Department. The incumbent will be responsible for receiving, identifying, segregating, storing, packing, issuing, and constructing shipping containers for all explosive, ammunition and components used at the Naval Weapons Center. He/she will also be responsible for transporting ordnance as required. All packing, shipping, construction of packing, transport and

Early registration for American Heritage Week's 5K Run/Walk ends at 4:30 p.m. on Monday

Deadline for early registration in the American Heritage Week's 5K Run/Walk is by close of business on Monday, May 21. Be sure to submit your entry forms to the Human Resources Department, Room 109 before the stroke of 4:30 p.m. If you don't have an entry form, you can pick one up from Sherri Baker (NWC ext. 2736), the run/walk coordinator in the Personnel Building, Room 109. Cost is only \$8 per entry prior to the deadline.

People who can't register before the deadline, don't worry. Late registration is being taken up to 11 a.m. on race day, June 4. Cost will be \$10 per entry.

All participants are required to check-in at the registration desk no later than 11:15 on June 4. Race-day registrants must check in by 11 a.m.

The race will start at 11:30 a.m. sharp at the Officers' Club southside parking lot. The course winds through NWC Housing and is hard-surfaced to accommodate wheelchairs or strollers.

Family members and friends are also encouraged to participate.

All entrants will receive a bright, neon commemorative t-shirt and awards will be given to the top finishers. A special drawing for prizes will be held at the end of the run/walk.

## Endurance challenged in bike race

HE CAN DO IT--Riders had to battle steep climbs during the Death Valley to Mt. Whitney race. At least nine China Lakers challengers took part in last weekend's event.

China Lake riders road away with some of the top honors during this year's Death Valley to Mt. Whitney bicycle race. In a field of almost 300 participants, three NWC riders, Dan Buckley, Bob Glenn and Tim LaFromboise finished first in each of their respective categories. Other NWC top finishers were Jeff Dalton, who finished fourth; and Tony Kratz, who finished sixth. Neil Christman, Ray Gratrix, Larry Siebold and Dieter Weik were also among the finishers.

The race started at Stove Pipe Wells in Death Valley and finished at Whitney Portals at the base of Mt. Whitney. Racers ranged from the general public to amateurs to Category 1 and 2 racers. The two-day stage race covered 100 miles and over 13000 feet of climbing.

# Weather ideal for first week of fishing season

Anglers at Crowley Lake reeling in extra-large browns

As cold and snowy as it was for the opener, the weather for the first week of fishing in the Eastern Sierra area was ideal. In the Mammoth Lakes region, the road to lakes George, Mamie and Mary is now open. George Lake is still half ice, but the other two lakes are ice free. Sonora Pass is also open, but Tioga Pass will remain closed until later this month.

According to the Bishop Chamber of Commerce, fishing is being reported as good in the Big Pine Area. While the Owens River is low, white power bait seems to be an irresistible temptation to the fish. Big Pine Creek is fair; for bait, use salmon eggs worms or power bait.

In the Bishop area, Lake Sabrina rainbows run in the 1/2 lb. range and the fishing is reported to be fair. The water level is low, but on the rise. Nightcrawlers are the best bet for bait. Pleasant Valley Reservoir is still producing nice-size trout, which are biting almost anything. Lower Rock Creek has rainbows in the 1 lb. range and the fishing is excellent. Yellow powerbait seems to be working the best.

Rock Creek Lake is releasing trout weighing an average of 1/2 to 1 lb. A variety of bait seems to be working in the streams.

According to the Bishop Chamber of Commerce,

Crowley Lake is the place for extra large browns. Reports indicate anglers have been bringing in browns as large as 5 lb. 9 oz. Through a five day period from May 1 through the 6, the fish have been in the 3 lb. or better range. Limits are being caught and anglers seem to be happy.

Nice size rainbows are being released from Convict Lake for those using power bait, power nuggets or worms.

In the Mammoth Lakes area, Twin Lake has been fair, with the fish running in the 1 to 2 lb. range. Nightcrawlers is the recommended bait. Lake George is still half ice covered and fishing isn't very good. Lake Mary, however, is great for the big brooders. Try power bait or any type of spinning lures.

Good fishing is being reported in all three lakes in the June Lakes area. Trout are averaging around 1/2 to 1 lb. and the best lures are rapalla and cast master. For stream fishing, try either worms or nightcrawlers.

In the Bridgeport area, The East Walker River is continuing to put out nice size trout on nymphs or a rapalla lure. Bridgeport Reservoir has 2 to 3 lb. rainbows and browns. Use a rapalla or a tractor blade set-up with nightcrawlers. Twin Lakes and Virginia Lakes have some nice pan-size trout.

**MicroLink Computer**  
386-33MHz with 4mb 60ns Memory \$2995

See below how the local "competition" matches up to a MicroLink.

**MicroLink 386-33**

- 4mb 60ns SIMMS Memory
- 1.2 AND 1.4 Floppy Drives
- 45mb 24ms Hard Drive
- 14" High Res. White Screen Monitor
- 5 Year Warranty
- 24 Hour Technical Support
- MicroLink Price ... \$2995

**The "Competition"**

- 2mb Memory
- 1.2 Floppy Drive
- 40mb HDD
- 12" Monitor
- 2 Year Warranty

Their Price ... \$3390

You could have this system with all these extra features .....

OR

you could have this system without the same features and pay \$400 more. (For similar system)

# Four nominated for FEB honors

(Continued from Page 1)

experience with new CCPs, is a member of the Center's CCP Working Group and was instrumental in the completion of the Center's CCP Handbook.

In 1982, Neff received an award for a Beneficial Suggestion by creating a "Document Control Record" form which simplified the tracking of Secret documents generated throughout NWC. This form is now used extensively on-Center. In 1987, Neff completely computerized the Secret document accountability system for her department. Her database and tracking methods have been used as a role model not only at NWC, but also at the Naval

Department in 1984 to staff a first aid station located in an ordnance plant doing experimental work with explosives and propellants.

In the nominating letter, Goss wrote, "In addition to her duties in providing first aid, administering a health monitoring program for those exposed to toxic chemicals, health teaching and counseling, she (Schoepflin) has been the person primarily responsible for developing a Wellness Program now expanded to include the entire Naval Weapons Center."

Goss noted Schoepflin still provides innovative methods to keep employees interested in health and wellness and to entice those who have not yet participated in the programs to a healthier lifestyle.

The final nominee, Hammonds, is now head of the Security Division, but when nominated was a security education and assistance officer in the Safety and Security Department. He was nominated for the Outstanding Professional Employee Award by his department head, Roy L. Parris.

As head of the Security Education and Assistance Office, Security Division, Hammonds was responsible for all security indoctrination and education for more than 6500 civil service and military employees at the Naval Weapons Center.

Parris noted that Hammonds possesses authoritative knowledge of all aspects of the security field and is recognized as an authority throughout NWC as well as the laboratory community of the Space and Naval Warfare Systems Command (SPAWAR), NWC's parent command.

"Hammonds was instrumental in the development of a guide on the proper procedures for accountability and control of classified information," noted Parris. "Using this guide, he developed a course of instruction implementing these procedures. This course has become a mandatory requirement for all personnel who are charged with the custody and control of classified information."

In addition, Hammonds is credited with establishing two new security education courses and editing and publishing a bi-monthly Security Bulletin. "He has devised puzzles and contests and has written various articles," stated Parris, "all of which increased the readership of the bulletin by the intended audience -- the non-security professional."

In recognition of all the nominees -- people within the federal government who have made the greatest contributions to the overall concept of public services -- the mayors of Los Angeles and Long Beach proclaimed May 11 as Federal Employees Day.

The third China Lake nominee, Schoepflin, is an occupational health nurse in the Ordnance Systems Department. She was nominated by her department head, Daniel A. Goss, for the Outstanding Professional Employee Award.

Schoepflin was hired by the Ordnance Systems

Department in 1984 to staff a first aid station located in an ordnance plant doing experimental work with explosives and propellants.

In the nominating letter, Goss wrote, "In addition to her duties in providing first aid, administering a health monitoring program for those exposed to toxic chemicals, health teaching and counseling, she (Schoepflin) has been the person primarily responsible for developing a Wellness Program now expanded to include the entire Naval Weapons Center."

Goss noted Schoepflin still provides innovative methods to keep employees interested in health and wellness and to entice those who have not yet participated in the programs to a healthier lifestyle.

The final nominee, Hammonds, is now head of the Security Division, but when nominated was a security education and assistance officer in the Safety and Security Department. He was nominated for the Outstanding Professional Employee Award by his department head, Roy L. Parris.

As head of the Security Education and Assistance Office, Security Division, Hammonds was responsible for all security indoctrination and education for more than 6500 civil service and military employees at the Naval Weapons Center.

Parris noted that Hammonds possesses authoritative knowledge of all aspects of the security field and is recognized as an authority throughout NWC as well as the laboratory community of the Space and Naval Warfare Systems Command (SPAWAR), NWC's parent command.

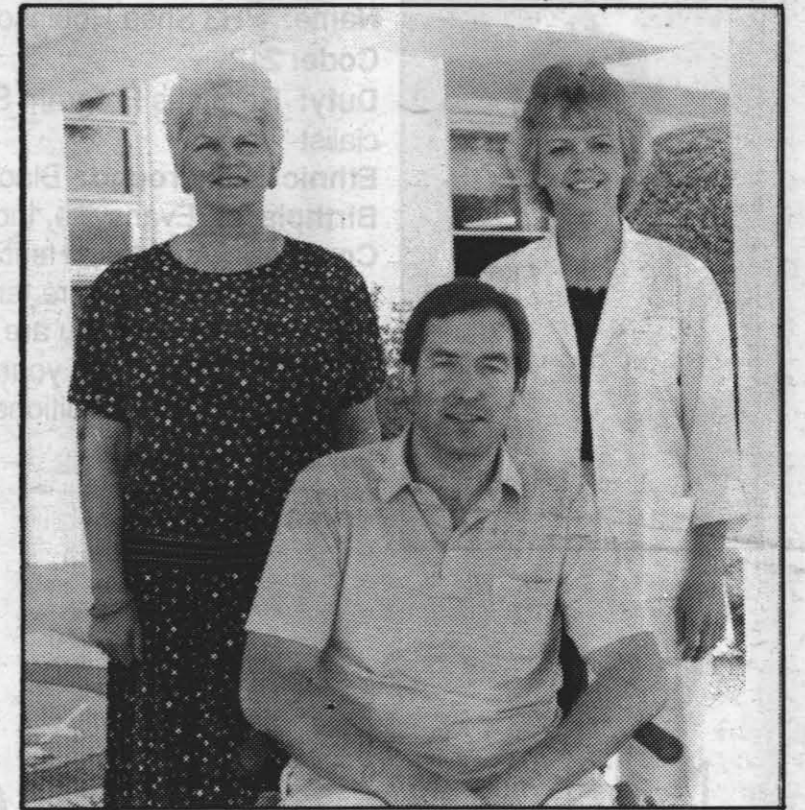

"Hammonds was instrumental in the development of a guide on the proper procedures for accountability and control of classified information," noted Parris. "Using this guide, he developed a course of instruction implementing these procedures. This course has become a mandatory requirement for all personnel who are charged with the custody and control of classified information."

In addition, Hammonds is credited with establishing two new security education courses and editing and publishing a bi-monthly Security Bulletin. "He has devised puzzles and contests and has written various articles," stated Parris, "all of which increased the readership of the bulletin by the intended audience -- the non-security professional."

In recognition of all the nominees -- people within the federal government who have made the greatest contributions to the overall concept of public services -- the mayors of Los Angeles and Long Beach proclaimed May 11 as Federal Employees Day.

The third China Lake nominee, Schoepflin, is an occupational health nurse in the Ordnance Systems Department. She was nominated by her department head, Daniel A. Goss, for the Outstanding Professional Employee Award.

Schoepflin was hired by the Ordnance Systems

## Back lot barbecue date changed

In last week's *Rocketeer*, the incorrect date was given for the Navy Exchange's barbeque in Michelson Lab's back parking lot. Instead of May 18, the date should have been May 24.

So, from 11 a.m. to 1 p.m., enjoy a lunch of barbeque hot dogs, hamburgers, beans, chips and sodas in the back parking lot of Michelson Lab. Prices will be posted.

**20MHz 386SX complete 2MB system \$1,595**

**20MHz 386SX AT.** Complete Foundation system with one 1.2MB/360K floppy drive & one 1.44MB floppy drive, 80387SX coprocessor socket, one parallel & two serial ports, high-resolution monochrome display & adapter, 2MB RAM, battery-powered clock & calendar, 48MB hard disk, baby tower or very nice "deluxe" desktop AT case, enhanced AT-style keyboard, application and system productivity & utility s/w. Runs it all: DOS, Unix, OS/2, & Windows/386. BIOS contains setup.

True 20MHz board with 20MHz processor, I/O bus speed separate from clock so you can use older cards, 80387SX socket. 3-year warranty on system, 1-year hard drive. 2MB system on sale: only \$1,595. MS DOS 4.01 \$69, 16MHz \$100 less, full-size tower case with display only \$40, VGA vers. of system \$1,894, 80MB 24ms SCSI \$99. Made in U.S.A.

# What does American Heritage mean to you?

**Name:** PR3 Shea Robinson  
**Code:** 212  
**Duty:** Religious Program Specialist  
**Ethnic Background:** Black  
**Birthplace:** Evansville, Indiana  
**Comment:** American Heritage is the freedom to get more familiar with who and what you are and to find out more about your roots and your people's traditions.

**Name:** Gerard W. Kersten  
**Code:** 3646  
**Duty:** Mechanical Engineering Technician  
**Ethnic Background:** Netherlands  
**Birthplace:** Maastricht, Netherlands  
**Comment:** American Heritage is the ability to choose my country. This is the country of my choice. I love and honor it and I am willing to fight for it.

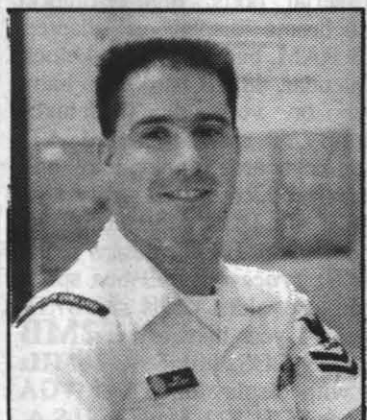

American Heritage Week, June 4-8 is just around the corner and many activities are being planned to celebrate *Your Past--Our Future*. But before getting into the planned events, let's review what American Heritage is, or rather, what it means to you.

The Naval Weapons Center established American Heritage Week as an event which focuses on the need for people to recognize the diverse backgrounds of employees at NWC and to utilize these differences, rather than discourage them.

Various people throughout the Center were asked what American Heritage means to them. Some answers were given quickly, others asked for time to think about it. Several people felt

American Heritage means the freedom to choose their own lifestyles, jobs, and how to raise their children. To others, it meant the freedom of expression; while others felt it was the opportunity to find out about their own and their own ethnic background. Now is the time to think about what American Heritage means to you, and how it has influenced what and who you are.

Activities planned to celebrate the different cultures at NWC include a 5K Run/Walk on June 4, the Equal Employment Opportunity Awards Ceremony on June 5, and food booths in front of the Headquarters Building on June 6 and 7. In addition, entertainment, guest speakers and EEO training classes will be featured during the week.

**Name:** MS2 Jonathan Rowcliffe  
**Code:** 21422  
**Duty:** BEQ Clerk  
**Ethnic Background:** Mixture, Italian on mother's side, German/English/Irish on father's side  
**Birthplace:** Batavia, New York  
**Comment:** American Heritage represents my country and what I do. It represents the people that fought for us so we have the rights we have now.

**Name:** Satik Martinsen  
**Code:** 36402  
**Duty:** Management Assistant  
**Ethnic Background:** Armanian  
**Birthplace:** Tehran, Iran  
**Comment:** American Heritage is the opportunity to learn more about different cultures. This is a Heinz 57 country, with different people and cultures, but with one thing in common, they are all Americans.

# Scores vary during youth soccer play

Tension accompanied many of the games last week when teams in the Naval Weapons Center Youth Soccer League once again hit the fields. The majority of the games were close, with just a few points difference to being tied, causing an extra element of excitement for the players. Less than a month remains in the spring soccer season at China Lake.

### Division I

#### Eagles 6, Express 3

Matthew Bloudek dominated the offense in the win, scoring five goals. Timothy Witt kicked in his first goal and Rodney Sloan made an excellent goalie for the winning team. Moves by David Begin, Glen Cordoz and Chrissi Wolfe, along with goals by Ryan Katzenstein and Whitney Harris, weren't enough to ground the Eagles.

#### Stallions 5, Cobras 0

With five goals by Jonathan Brown, assisted once by Mathew Chambers, the Stallions galloped to victory. Tarek Giraldo made a formidable opponent against the Cobras, who had good play by Dana Cain, Kyle Cliborne and Christopher Marshall.

#### Cougars 0, Apollos 0

Effective defense on both sides prevent either team from scoring. The Cougars saw exciting plays by Rebecca Cornell, Rachel Trowbridge, Joseph Shermer and Shannon Parks. The Apollos had outstanding

defense by Jon W. Harris, Joey Andrew-Hozman and Brian Hauran.

#### Sounders 0, Hurricanes 0

Saves by goalie Patrick Chan and defensive moves by Brian Kajiwara and Stephen Ribultan kept the Hurricanes from scoring. Offensive plays by Rory O'Neil and Kevin Boland were blocked by the Sounders' defense, consisting of Ely Roberts, Patrick Shearer, Curtis Monastero and Amanda Johantgen.

#### Coyotes 2, Owls 0

Offensive support by Allison Spencer and Ben Roush, and goals by Erik Johnson and Kelly Gartner put the Coyotes on top. Though a bit short on offense, the Owls had excellent defense by Jay Beines, Greg Ford and Al Krabbe.

### Division II

#### Strikers 3, Whitecaps 3

In an action-packed game, neither team could out-distance the other. Strikers' goals were knocked in by Rayn Koziel, Curtis Allen and Arthur Walker. George Lloyd was credited with an assist. Whitecaps scorers were Jeff Robbins, with two goals, and Ryan Sloan.

#### Wolves 2, Bullets 0

Teamwork and plays by Doug Bowman, James Fujiwara, Jeff Haack and Karla Viliegas, along with goals by Sam Elson and Johnathan Ford, resulted in victory. Defensive moves by Karen and Beth Behr, Amy

Dorrell and Joe Jordan, however, kept the Wolves from a big win.

#### Rockets 2, Electrons 1

In one of the Rockets' most competitive games of the season, efforts by Chandelle Harris, Clifton Idlett and Duncan Nicholson, along with goals by Brett Thomsen and Floyd Willis, allowed the Rockets to tally another win. Adam Szymanski and Jordan Hansen were superb goalies in the loss. The Electrons' lone goal was kicked in by Earl Shiflett.

#### Jets 3, Earthquakes 2

Teamwork and three goals by Robbie Hoffman propelled the Jets to victory. Kenny Chitwood, Jason Hickle and Ben Nazek were exceptional players in the win. The Earthquakes did not turn in a score sheet.

#### Diplomats 4, Roughnecks 2

Outstanding offense and defense, along with goals by David Rollingson and Jason Hiett, weren't enough for the Roughnecks. Despite the loss, Mark Schramm, Erin O'Neil and Jared Parker played an excellent game. The Diplomats did not turn in a score sheet.

### Division III

#### Lancers 2, Goalbusters 0

Goals by Chris Potten and Nicholas Ford, along with great defense by Chrissy Self, put the Lancers on top. Despite their best team effort, and aggressive plays by

Josh Pezzner, Bill Yeager, Jeremy Hayes and Jason Bowling, the Goalbusters didn't bust any goals.

#### Soccers 10, Stings 2

The Soccers stole the game when Galen Wilson kicked in three goals, Robert Tomlinson and Frank Gamble each knocked in two goals and Jamie Rugg and Thai Gutierrez each booted in a goal. The Stings played under the handicap of not having enough players. However, Katy Jo Roberts, Jonathan Mickelsen and Melanie Westberry played a good game. Ben Coleman and Robert Tomlinson each kicked in a goal in the loss.

#### Mustangs 9, Furies 4

While the Mustangs did beat the Furies, goals by Aaron Knecht, Glenn Conrad and Heather Busby, along with knowledgeable plays by Ericka Lewis and Randy Martin, showed the Mustangs that the Furies were a formidable opponent. Heather Busby was credited with one assist for the Furies. The Mustangs did not turn in a score sheet.

#### Aztecs 4, Renegades 1

According to the Aztecs' coach, Elliot Borden's goalkeeping and Michael Eberhart's solid defense kept the Renegades' from scoring in the second half. The winning scorers were James Gonzaga, Steve Sticht and Charlie Eberhart. The Renegades did not turn in a score sheet.

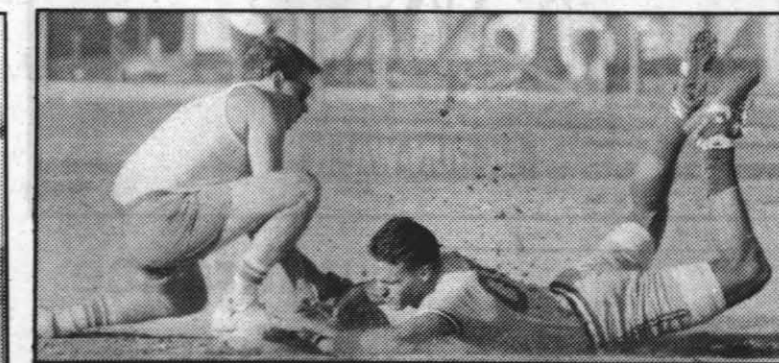

## NWC Intramural Softball League starts season

Each of the six teams in the Naval Weapons Center Intramural Softball League will try for the gold as they go head to head in a number of games this season. Teams are Team 1, Ops; Team 2, Branch Medical Clinic; Team 3, Code 21; Team 4, VX5 Vampires; Team 5, Under Achievers; and Team 6, Ordinance.

All games will be played at Schoeffel Field on Mondays and Wednesday. Starting times for each day are 5:30, 7 and 8:30 p.m.

HE'S OUT!-Softball can be a game of inches as this base runner found out last week.

## Feel the Need for Speed?

100% Plug Compatible with Intel 80287 & 387  
 IIT's superclone of Intel's 80287 & 80387 math coprocessors, the 2C87 & 3C87 respectively, can speed applications by up to 200% over the corresponding Intel math coprocessor. Your system will run up to 2 times as fast (even faster in some cases) as it will with an Intel 287 or 387. (All applications we have run show a marked improvement, with graphics & CAD showing most speed-up.) The 2C87 & 3C87 offer speed, 5-year warranty and more...

- 15 to 300% speedup
- runs cool: 0.5Watt typical dissipation
- works in any 286 or 386's coprocessor socket
- 2C87 provides all 387 instructions
- 80-bit internal architecture 32, 64 & 80-bit floating point data
- extends instruction set to include 4x4 matrix--up to 8 times as fast

Type	Speed	List price	Your price
2C87	10MHz	\$339	\$229
	20MHz	439	299
3C87	16MHz	439	299
	20MHz	499	349
	25MHz	639	449
