Competency exam for CSUB/CSUC undergrads scheduled for Jan. 19

The Upper Division Writing Competency Examination will be given Jan.19, 1993. CSU, Bakersfield and CSU, Chico undergraduate students may satisfy the writing competency requirements by passing this examination.

CSU, Bakersfield undergraduate students must have completed at least 90 quarter units of college work prior to taking this writing examination.

CSU, Chico undergraduate students planning to take CSCI 172: Systems Architecture must pass the writing exam prior to the beginning of the course.

The examination fee is \$12. Checks must be made payable to CSU, Bakersfield. Contact Denise at 939-2648 to arrange to take the exam.

Hutmacher earns 1992 Hays Award

ill Hutmacher, a China Laker since 1972, won the 1992 B.W. Hays Award for Production Support at ceremonies held Monday afternoon. "He exemplifies what production support is all about," said Burrell Hays of the fourth member of the Engineering Department to capture this honor.

Matt Anderson, head of the Engineering Department in the Naval Air Warfare Center Weapons Division, noted Hutmacher and the three winners of Golden Rung Awards were examples of excellence in the overall production support effort at China Lake and NAWCWPNS. The winner heads the Systems Electronics Branch in Code C25 Systems Engineering Division.

Joining Hutmacher as honored employees this year were Bret A. Combs, of the Microelectronics Branch, James Walters of the Missile Guidance Branch and Mary Beth Borst of the Missile Systems Branch.

"This award is very important to me," commented Hutmacher, "it is a significant honor." He also noted he firmly believed in the saying, "if you do production support correctly, you'll have successes" and in the "hands-on experience" called for in

Hays, a former head of the Engineering Department and technical director for the Naval Weapons Center, retired in 1986 and established this special award in 1989.

In his remarks, Hays noted he sees exciting opportunities in the future for people who know production support and who understand the production process. He added that he expected growth in the kind of work the NAWCWPNS Engineering Department employees do after 1995.

In praising Hutmacher, this year's award winner, Hays noted he began his production support career working on the Sidewinder AIM-9L effort. He is someone who typifies the motto of the Hays Award, "without the hands-on experience, the China Lake way is impossible."

Previous winners of the Excellence in Production Support winners were Steve Tanna in 1991, Terry Kuhlman in 1990 and Jim Suhr in 1989. The B.W. Hays Award promotes visibility for the production support role and recognition for individuals whose outstanding work has been of special value to the overall production support effort. Nominees are expected to have demonstrated innovative approaches in solving production problems or issues, developed and adopted significant methodology changes in the application of production support disciplines, represented the Engineering Department and NAWCWPNS in the production support of weapons and demonstrated creativity and innovation in the application of technical skills to production support of weapons. Please see HAYS. Page 5

Rocketeer to go biweekly in January

From the Public Affairs Officer: These are times of transition in the Department of Defense, and China Lake is no exception. Many changes have taken place here over the past year through consolidation and realignment. All departments are feeling the budget crunch, and the Naval Air Weapons Station public affairs staff is no exception.

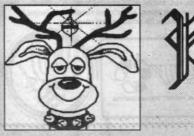

Due to the need to reduce overhead budget expenditures, numerous public affairs endeavors will be streamlined or cut back, including The Rocketeer. Starting with Thursday, Jan. 14, 1993, the newspaper will be published biweekly-on Thursdays of payday weeks only. Because the

Questions can still be sent in anonymously, but for a personal reply, please include your name, code and telephone number. If further information is needed, please call 939-3354.

I was led to believe that the rebadging process that recently occurred was for the purpose of tightening security and limiting access of areas to those that work there. It also included updating the vehicle base stickers for all employees that work aboard this installation. With this in mind, why are vehicles of base employees with no stickers, permanent or temporary, allowed to pass through the gates of China Lake?

Since the Persian Gulf crisis is behind us I understand the cut back in some of the security measures was necessary. All anyone has to do is show a China Lake badge as they approach the gate guard and they are waved aboard, no questions asked. Allowing an unregistered vehicle to pass through the gates seems to go against the whole costly reason for rebadging everyone that works on the base. How does the gate guard know the badge belongs to the individual driving the vehicle? The badge could have been lost or stolen. Also, with no sticker on the vehicle, how does the security department know who belongs to that vehicle if it were parked/abandoned near one of the secure buildings/areas? As soon as that vehicle enters the gate we have lost control of it.

Having a base sticker also insures that the driver is properly/ legally covered by insurance, has a valid drivers license and understands the rules and regulations of the base. Again, we have lost control of the whole reason behind rebadging the employees of China Lake, SECURITY.

The rebadging and vehicle re-registration effort were two separate actions, not directly related. Our rebadging effort was designed to enhance the security of our restricted areas. Vehicle registration was updated primarily as a convenience to employees. Since badges and vehicle decals expire simultaneously, employees were given the opportunity to reregister their vehicles and save a trip to the Visitors Center. Re-registration of vehicles was not mandated. A secondary goal was to assist employees in de-registering vehicles that were disposed of without the decal having been removed.

The current policy is that only vehicles entering restricted areas are required to have decals. Persons accessing non restricted areas on Station (e.g., community area, gym, base exchange, commissary, public schools, etc.) need only present proper identification (employee badge, military/civilian identification card, community pass, or driver's license) and have a legitimate reason for access. With the exception of periodic THREATCONS, when more stringent procedures were enforced, this policy has remained the same for workday access for six years.

The decal number on a vehicle identifies the registered owner in the same way as a license plate number. The owner of a parked or abandoned vehicle can be identified by the decal or license plate and there is no loss of control. A decal does not ensure that a driver is properly/legally covered by insurance (which can be canceled the day after the decal is issued). A decal does not ensure that a driver understands Station rules and regulations (when a less experienced family member is driving the vehicle). Current OPNAV authorized procedures permits employees to certify that they have the required insurance and understand the adverse ramifications of driving on station without required insurance.

Your concerns are appreciated. The Safety and Security Department periodically reviews current vehicle registration procedures. Requiring all vehicles to have a decal before engress to the Naval Air Weapons Station would appreciably enhance security, however, it is not warranted at this time.

COMMUNITY

On Saturday Dec. 19, The High Sierra Cyclists bike club will hold its fourth annual Christmas light ride. This slow-paced ride starts at 6:30 p.m. from Frisbee's Bike Shop on Balsam Street and will wind through selected neighborhoods of Ridgecrest observing the holiday decorations. The ride will cover about 5-8 miles and take about 60-90 minutes. Limited free child care will be available to riders. At the conclusion of the ride, participants will enjoy a hot cocoa, hot cider and dessert buffet. Riders will vote for their favorite decorated home

and the club will present a gift to the residents of the winning home. This event is open to all participants at no cost, but optional donations of nonperishable food items or unwrapped gifts will be accepted for inclusion in the clubs Christmas food baskets. Legal lighting, warm clothing, and a holiday spirit are all the special equipment you will need for this ride. For further information contact Joe or Marlene DeLory at 375-0325.

#

Santa Claus is flying in for the third annual Holiday Hullabaloo at the Community Connection for Child Care on Thursday, Dec. 17. The Hullabaloo will be in two sessions this year, from 10 a.m. to 11 a.m. and from 11 a.m. to noon. Refreshments will be served. Remember to bring a camera to catch a photo of the children with Santa. Caregivers and parents are advised to sign up early (space is limited) by calling the Community Connection at 375-3234.

#

Community Connection for Child Care parenting tape for the week of Dec. 22 to Dec. 28 is entitled "Nutrition Needs." Information on nutrition, portions and introducing new foods. This 3 to 4 minute tape can be heard from 5 p.m. to 10 a.m. by calling 375-0446.

The Rev. Dr. Edward E. Jayne, pastor of the United Methodist Church is offering to church members and the community an Effective Communication in Marriage Workshop beginning on Tuesday Jan. 5 at 7 p.m. Preregistration will be taken by phone at 375-7434. There will be a \$20.00 fee per couple to cover materials.

Fatemeh Holste, Professor of Art and Gallery Director at Mt. San Antonio College, Walnut, California, will exhibit a selection of oil paintings entitled "Canyon Series" at the Maturango Museum beginning Jan. 9. A preview reception for members will be held Jan. 8 from 7-9 p.m. including a presentation by the artist.

Santa isn't the only one who delivers!

Oak Specialties will be delivering up to and including December 24th.

SOLID OAR MADE IN USA

Commander, NAWCWPNS offers holiday greetings

he Naval Air Warfare Center Weapons Division marks its first anniversary in January. Just as the country embarks upon a period of transition, this organization also continues to transition into a dynamic, multi-faceted component of the Naval Air Warfare Center and the Naval Aviation Systems Team. Our combined military and civilian team stands ready to meet the new challenges ahead—both here and abroad.

Dramatic world events continue to unfold in Somalia, Europe, the Persian Gulf, and elsewhere. As America and the world prepare for the holiday season and a new year, thousands of our fellow sailors, Marines, soldiers and airmen are once again far from home, serving their country, protecting freedom and providing hope of a better future for millions of people. Television drives home the point on a daily basis how very important the United States Armed Forces is to the preservation of world peace.

It is as important now as in the past to take some time during your busy schedules to remember the thousands of men and women who are far from home this season. Remember, that like yourselves, they voluntarily serve this great nation — making sacrifices to defend a way of life and bring hope to others. Sacrifices such as these are what has made this country the cornerstone of freedom.

Throughout this holiday season, as we celebrate Christmas, Hanukkah and New Years Day, we should be mindful of the many blessings we enjoy as individuals and as a nation. We should also not forget those at home who are less fortunate, who also experience the pangs of hunger and lack of job security. So many of you demonstrated your generosity by sharing with others this year--whether it was by volunteering your time or contributing to the Combined Federal Campaign or other worthy causes, you've selflessly given.

You are all valued members of our team, and Judy and I wish you all the best and safest of holidays.

RADM William E. Newman, USN Commander, NAWCWPNS

Sexual harassment advice and counseling available by telephone

WASHINGTON (NNS) In another action to eliminate sexual harassment in the Navy and Marine Corps, toll-free sexual harassment advice and counseling telephone line began operation Dec 1.

The number is 1-800-253-0931 for callers in the United States. Callers from outside the U.S. can phone (DSN) 224-2735 or (703) 614-2735 (collect).

Lines will be staffed from 10 a.m. to 6 p.m. (EST) Monday through Friday. An answering machine will take messages and provide referral numbers after hours, on holidays and weekends.

The new toll-free service is designed to offer information and advice to anyone who might be involved in, or concerned about an incident of sexual harassment. Assistance is available to all Navy and Marine Corps personnel. Including civilian employees.

Acting Secretary of the Navy Sean O'Keefe directed the establishment of the phone line based on recommendations from the Standing Committee on Military and Civilian Women in the Department of the Navy, which developed and evaluated several new initiatives to combat sexual harassment.

"We want our members to have the confidence and support necessary to address sexual harassment at the local level when it occurs," said Assistant Secretary of the Navy (Manpower and

Reserve Affairs) Barbara Pope. "This line will be another avenue for reliable, timely and straightforward advice."

The toll-free service may be used by victims of sexual harassment, persons accused of sexual harassment, those who have witnessed sexual harassment and those who simply have questions about Department of the Navy policy on sexual harassment. For victims, the staff of the toll-free line will offer support that is both physically and emotionally removed from the local scene. Callers will receive advice on their roles and responsibilities in resolving sensitive or difficult situations and information on assistance available locally.

Persons using this service will not be required to identify themselves by name or command. Also, calling the new toll-free number will not, in itself, initiate an investigation. Complaints of sexual harassment normally are reported through the appropriate chain of command.

If the chain of command is "part of

the problem," victims of sexual harassment may use other means to report misconduct, such as the Navy Inspector General's Fraud, Waste and Abuse "Hotline" (1-800-522-3451), or filing complaints under Naval Regulations Article 1150 or Uniform Code of Military Justice Article 138.

1993. "Please plan accordingly," said

Service personnel can double life insurance

WASHINGTON (NNS) - Since December 1, active-duty and reserve military personnel can double their Serviceman's Group Life Insurance (SGLI) coverage from a maximum death benefit of \$100,000 to \$200,000 by agreeing to pay \$8 more each month, or a total of \$16 a month, from their paychecks.

Increased SGLI coverage is available to Navy and Marine Corps personnel in increments of \$10,000 up to the new \$200,000 maximum. Applying for more coverage is voluntary, but service members have only until March 31 to increase coverage without proof of good health.

Service members can increase their SGLI coverage by completing the new form, SGLV 8286 (November 1992 edition)

If the new form is not available, the September 1991 edition may be modified and used temporarily.

DeCA has new leader

Army Maj. Gen. Richard E. Beale Jr., is the new director of the Defense Commissary Agency. He succeeds Maj. Gen. John P. Dreska, the agency's first director who has led the agency since June 1990. Dreska will retire Jan. 1, 1993.

Beale was previously commander of the Defense Personnel Support Center, headquartered in Philadelphia. The center has some 5,000 employees worldwide and annually buys nearly \$4 billion worth of food, clothing, textiles, medicines and medical supplies for American forces. He has been commander since July 17, 1991.

Beale, a native of Bethesda, Md., was commissioned in the Army's Quartermaster Corps in June 1964 as a distinguished military graduate with a bachelor's degree in economics from Wake Forest University. He also holds a master of public administration degree from the University of Mis-

A Christmas message from your chaplains

Dear Friends and Neighbors:

Already the sounds, sights and smells of Christmas are permeating the air in a grand announcement of the birth of Jesus. No other season of the year is so exciting, especially for children, and especially for Christians whose spiritual heartbeat was born out of their encounter with this Savior sent from God.

Jesus was born in a smelly stable in the little town of Bethlehem nearly two thousand years ago. From this humble beginning this Child became the one solitary figure in all human history that bears the unshakable stamp of both humanity and divinity.

Whether out of praise and devotion, or out of sheer disdain and vanity, more words have been spoken, more books written and more thoughts provoked about Jesus Christ than a combination of the greatest figures in history.

One may ask, "How can a birth that occurred in antiquity have any significance for contemporary man?" In this great event that occurred in time and history God entered into the human family in a special way; into the frustrating circumstances of poverty, taxation, human sufferings of all sorts and political overlording. Much, if not all, of the world can still identify with these conditions. He came then to bring "peace on earth and good will toward men." He has not ceased coming to man with the same objectives. Where the minds and hearts of humanity have been open to His redemptive love there has been peace and brotherhood; where man has been insensitive to God's love and the needs of humanity there has been war, chaos, disharmony and exploitation

His significance lies not in His birth alone. That birth was but the beginning of history's most spectacular and beautiful life. There would be no reason to celebrate Christmas were it not for His ministry of love and compassion, His sacrificial death on the cross, and His victorious resurrection. We have more than His profound words and unimpeachable personal example; this..., yes...!, but more importantly, we have His undying presence, for He is the living Lord! He is here.., make no mistake about that, inescapably so! And He., that Savior of great love, all sufficient grace, and enduring strength,...will encounter you personally in your life's pilgrimage. This is the significance of Christmas! Not the tinsel and lights, the tree or presents.., not the star of Bethlehem... and not even the wise men, the shepherds or the angels who sang.., Christmas is God with us. Dare we meet Him and experience the relationship of love and grace He offers the profound purpose and meaning of life will be ours to celebrate with joy and thanksgiving.

Make Christ the celebrity, the guest of honor in your celebration of Christmas, and you will find the joy that Christmas was

We wish for you and yours a Merry Christmas and a Happy New Year.

Michelson Lab power outage scheduled for Dec. 19 and 20

Richard D. Smith, Michelson Laboratory facilities coordinator, has announced a total power outage for the laboratory and portions of the compound. Please read posted notices in Michelson Laboratory for specifics and take precautions for your

The total outage is 19 and 20 Dec., starting at 7 a.m. for 48 hours.

Michelangelo virus update

Virus warning!

The Michelangelo virus has been identified on vendor packaged software, according to the COMPU-SEC ADVISORY 92-29. The software update to CACI International Inc. Far-Trieve AR 48 and AR 49 has the virus on the installation disks. As some of you know, the Michelangelo virus can cause data corruption or even the deletion of all files on the hard disk. If you have any of these update disks, we suggest that you call Sharon at the PC-Lab (499-2081) for more information. The PC-Lab will scan your disks and your hard disk if you believe

your PC may have been infected by this dangerous virus.

Library Update.

If you were in the Software Library within the last week, you might notice that there was as slight mess. To be exact, there was quite a mess at several different times. Well, we had a reason for our disorganization. We were reorganizing to make it easier for you to find the software you need. We now have a Windows section for all of you who use, or want to use, Windows. So come on in to see the "new and improved" software

CUT BACK from Page 1

publication will not increase in size, it will mean a reduction in coverage of issues. We will need earlier submissions of news items for timely dissemination of information.

Product quality is a high priority, and I regret the necessity of this reduction in service. However, we remain committed to keeping the information flowing. The Rocketeer staff will continue to offer the best possible service and product in a timely fashion. Please feel free to call the Public Affairs Office, 939-3511, with your comments or suggestions.

To facilitate a reduced staff in getting the paper to the contract printer on time, a new deadline for submission of news items and photos has been established as the Wednesday prior to publication week. Thus the deadline for the first issue of 1993 will be Wednesday, Jan. 6, for publication on Jan. 14, and Wednesday, Jan. 20 for the next issue, which will be distributed on Thursday,

Public Affairs will continue to send out Issue Alerts on important items of interest. An information bulletin board outside the Public Affairs Office, Building 1, Room 1043, also offers posted information.

For the benefit of China Lake employees, the printing schedule and deadline for 1993 follows. Please save this for future reference.

PIERRE SAINT-AMAND

By Kristine L. Roquemore, Technical Information Department

(EDITOR'S NOTE: We now conclude the series on Dr. Pierre Saint-Amand)

After talking with Saint-Amand, I spoke with two of his former employees who graciously escorted me down the Pierre Saint-Amand memory lane. Dr. Glenn Roquemore is a former NWC geologist. Dr. Dan Gillespie now heads the Math Group in the Research Department and was a mathematician for Saint-Amand's division.

Roquemore is currently Professor of Geology at Irvine Valley College, Irvine, California and lecturer at the University of California at Irvine. He worked in the Earth and Planetary Science Division with Pierre for over ten years.

Dr. Glenn Roquemore

ROCKETEER: What can you tell me about Pierre Saint-Amand?

ROQUEMORE: The man is a genius. And, he was my mentor! I was very fortunate. He was very instrumental in my interest in geology. His sheer enthusiasm over geology was enlightening and contagious. He taught me to open my eyes to really look and observe everything around me and make intelligent conclusions. It sounds simple, but its critical to a geologist.

ROCKETEER: Are you still close to your mentor even though you've left the area?

ROQUEMORE: Hmmm...Well...Yes and no. See, a lot of things happened over the years and there was a period of tension between us. Though most of that has healed now. In a nutshell, the base was winding down all of the research we conducted. And, it was during this time I chose to flex my wings and jump out of the tree so to speak. Lousy timing. But, the student was ready to leave the mentor. It caused tension between us. I should have been more supportive of Pierre during that time. But, I was young and thinking of myself. I think he's forgiven me. So, yes now our relationship is close again.

ROCKETEER: Looking back, what are the things you most remember about Pierre?

ROQUEMORE: There's a lot. I remember most fondly his skills as a teacher. He was an excellent, excel-

lent teacher. I don't remember him ever lecturing me. Or telling me, "This is the way it is, period!" He would just point out interesting things for me to discover on my own. And, I think what really made the man was his diversity. Pierre was not just a specialist in his field, like I would consider myself. He knew chemistry, physics, mathematics, geochemistry, all the traditional areas as well as any specialist. He had a remarkable command of all the sciences to a very high degree of expertise.

ROCKETEER: There's a lot of hype still lingering about Pierre Saint-Amand and Carl Austin. Care to elaborate your views?

ROQUEMORE: They were coming from two very different standpoints. Pierre didn't like politics. Carl did. Pierre's only interest was in science. Carl's wasn't. I think there are a lot of aspects about the so-called feud between the two that people don't know anything about. I think people tend to play the two against each other. They were really for the same thing, but in two very different ways.

ROCKETEER: Are you referring to the Geothermal potential at Coso?

ROQUEMORE: Yes. Pierre never doubted there was geothermal potential at Coso. And, yet, that's the popular belief. Carl, for his own reasons, wanted to do the job quickly. Pierre, on the other hand, knowing full well exactly what Coso had and what the potential was, wanted to take a slower, more scientific approach. It would have taken much more time, but the end result would have been the same.

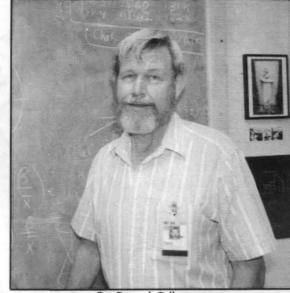

ROCKETEER: What would you say were Pierre's biggest contributions to the China Lake Center?

ROQUEMORE: I think his largest contribution was being a stellar scientist. I can't point at any given achievement, there were so many. He wasn't a big fish in a small pond. He was big fish in a world-wide pond. Pierre presented the Naval Weapons Center to an international audience. He was involved with President Kennedy's Scientific Council, asked to go to South America, India, the Philippines...all these things puts him in a class of his own. To hear anyone refer to him as the ex-NWC geologist is a great disservice, because it leaves out three quarters of what he really is.

ROCKETEER: Any reflections?

ROQUEMORE: Pierre Saint-Amand gave me the most incredible ten years of my career so far. And, he gave me a career that most geologists outside of the Center envy. He was my Obi-Wan-Kenobi!

Gillespie heads the Research Department's Mathematical Sciences Group. For more than 20 years he has been doing research in the filed of random processes, particularly Markov processes. His book, "Markov Processes, An Introduction for Physical Scientists" has hit the market and is now available in book stores. Gillespie worked ten years for Saint-Amand. The Mathematical Sciences Group is the last vestige of the Old Earth and Planetary Science Division. Pierre had this to say about Dan, "Gillespie is still in the Math Group and doing beautifully. God that guy is brilliant!"

Dr. Daniel Gillesp

ROCKETEER: What do you remember most about Pierre Saint-Amand?

GILLESPIE: What I remember most about Pierre is the.... the sheer enthusiasm he had. He was like ...a great macho scientist!

ROCKETEER: Wait a minute...You better explain that one!

GILLESPIE: He was exciting. He would get incensed. He appreciated Mother Nature. What Mother Nature could do in terms of earthquakes, volcanoes, hurricanes, rain storms, tornadoes. All of these very powerful natural forces. They appealed to him because they were big, strong and burley, right?! And, they could literally blow you away!

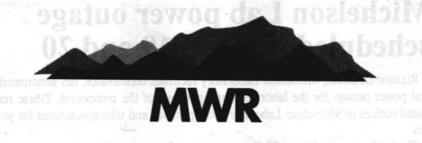

And, he was often affronted that nature would rebuff him. Like Mother Nature is not going make me afraid—I will stand up to it. He'd fly into hurricanes. Probably his greatest thrill is to be in an earthquake. A big massive earthquake...he'd like to survive. He wouldn't want to see people killed, but I think he'd enjoy it. He's probably one of the few people who would thoroughly enjoy being in a big earthquake!

ROCKETEER: You were in charge of giving a presentation at the Naval Weapons Center "wake" a little while back and you picked Pierre as your central character to typify the Research Department?

GILLESPIE: I wanted to focus on the one thing that stood out the most in the Research Department over the last 20 years. That was Pierre. The man is colorful—that is the word I would use to describe him.

ROCKETEER: What do you remember most about the cloud-seeding days?

GILLESPIE: A number of people here were involved with cloud seeding. This was Pierre's forté. His main line of work when I came here in the 70's. He had been in the office of every Central American President that there was talking about cloud seeding. How many Presidents do you get to meet? You have to take what you can get. He was very proud of a plaque that he had from Ferdinand Marcos—before Marcos became a bad

'Designated Driver' program has strong China Lake MWR support

The Designated Driver Program is a Navy wide and national commitment of people that have joined together to prevent patrons from driving while influenced by alcohol consumption and potentially injury themselves or others.

At the Naval Air Weapons Station China Lake, MWR's holiday goal is to actively promote this program. Our first commitment, before offering you fun recreational opportunities for the holidays, is to make your holiday parties and functions end as safe as they started. Designated Driver posters are posted in MWR facilities.

As always, the NAWS Duty Driver will take you home safely during the holidays and the months ahead. Simply call 939-2303 for a safe ride home. This program is ongoing, with special emphasis placed during the

guy-thanking him for drought relief in the Phillipines. He did drought work all over the world.

He loved this type of thing. It was very exciting science. So, he was involved in all of this stuff and moreover, he was hob-knobbing with some very interesting characters. It was fun and exciting to work for such a bigger-than-life personality.

ROCKETEER: What would you say was Pierre's biggest contribution to the center?

GILLESPIE: His biggest contribution was his work...I think... in weather modification. And, he also brought some color to the place. He didn't invent the Sidewinder....He's not Bill McLean...But, he brought color and dash to the Naval Weapons Center. And, he showed people that even science can be fun.

In many ways he is a true scientist. Because, he's got this boyish-childish, let's say spirit of inquisitiveness. Always wanting to know how things work.

He brought an atmosphere to China Lake. Oh, and he was good to me. I didn't realize how nice I had it until he was gone and I got out in the real world. When I came onboard he always overrated me. I was never as good as Pierre thought I was.

ROCKETEER: What did you learn from Pierre Saint-Amand?

GILLESPIE: His philosophies for management were wonderful. Pierre said something once that I really liked and still remember. He said, "I've known people who are afraid to have people working for them who are smarter than they are." And, he continued, "I feel just the opposite. I'm afraid to have people working for me that aren't smarter than I am." That's something that stayed with me. I think, I owe Pierre for a lot of intangibles in the way I relate to people.

ROCKETEER: Any last memories?

GILLESPIE: Yes. One of the best things Pierre did was bring in one of the members of my math group. Jorge Martin. Jorge is a Ph.D. in mathematics. Grew up in Mexico. Got his Ph.D. from the University of Utah, in mathematics and in a very difficult area. Pierre heard about Jorge from a recruiter. Anyway, Pierre brought Jorge Martin here to give a talk and didn't exactly check into all the procedures. So Jorge came to China Lake, gave a talk, and we liked him and the talk very much. Consequently, he joined the group and has become a very valuable member. BUT, it was Pierre who got him here. If I had been there, I would have called up and said, "Can I bring this guy out here to give a talk?" And they would have said, "No way....he's not a U.S. citizen." And, I would have said, "Okay. That's the end of that."

But, Pierre didn't do that. It was a long shot. He wasn't afraid to take it. And now, Jorge Martín is a leading figure in this department and has done very good work here. I can only thank Pierre for that. In fact, there is an endless list of things I can thank him for.

Thank you Pierre!

"Aspects of Pierre—The Person" was written by Reta Roquemore who worked more than two decades with Pierre Saint-Amand. When reflecting on their past Pierre said, "Reta was the ideal person in the office because she could make up for all of my shortcomings. Like never being able to remember anything. She could remember everything! And, she was very diplomatic and could deal with all sorts of people. She was a marvelous part of the group."

Reta read the following to Pierre and Marie, at his retirement party in 1988. According to Dan Gillespie, "Nobody knows Pierre better than Reta!"

Dr. Pierre Saint-Amand and Reta Roquemore

Aspects of Pierre—The Person by Reta Roquemore

A very caring and compassionate man—a best friend to those who would allow him to be.

Always there, with Marie, to share your sorrows or to celebrate your joys.

A "Glorious Leader" —one who led by working

side by side with his people. A teacher and counselor. Always eager to encour-

age everyone, but especially the young. A man of contagious enthusiasm, of wisdom and

And, on St. Patrick's Day, a man with a green

New mill advances propellant processing effort

TQL planning, environmental protection, technology advancement...The recent procedure for installing a fluid energy mill at the Salt Wells propellant processing facility

Ammonium perchlorate (AP) is the oxidizer in most modern propellants. To achieve a high burn rate a significant amount of the AP in the propellant must have a particle size of less than five microns. In the past, 200-micron particle size AP, as it is received from the factory, was ground to obtain the small diameter AP.

This grinding was done by placing the 200-micron AP and a chlorofluorocarbon (CFC) refrigerant in a tank with ceramic beads and vibrating the tank. The resulting slurry was removed, separated from the ceramic beads and the refrigerant evaporated off. Grinding took 7 hours and drying, a week.

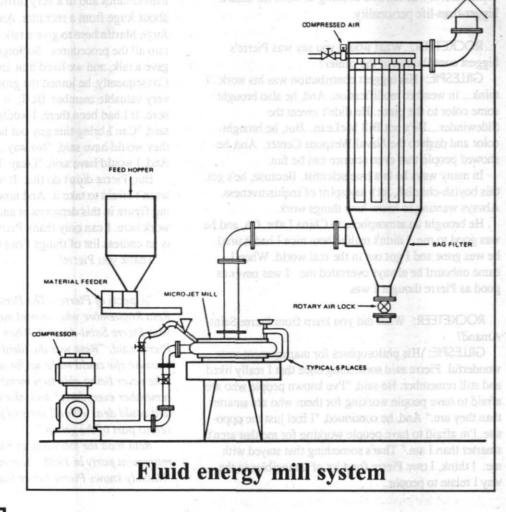

During drying the CFC refrigerant escaped into the atmosphere, a procedure which was forbidden by the Environmental Protection Agency, effective July 1992. The EPA has further banned production of CFC refrigerant after 1995.

So in September 1991 a contract improvement action team (CIAT) was established to research, establish requirements and put together a package for an Asset Capitalization Program procurement of a fluid energy mill and associated equipment

The CIAT was established with a mind toward using total quality leadership techniques by including representatives from management, technical, procurement and quality assurance disciplines. It included John Robbins, head of the Propulsion Systems Division, and Roger Toftner, head of the Ordnance Processing Branch, Code C2772, in the management role; Tony Dorsey, head of the Project Engineering Branch, and Harold Bennett, from Ordnance Processing, as technical advisors; and Helen Cropper from pro-

Once the CIAT had developed the acquisition requirements package (ARP), the project received ACP funding of apporoximately \$275,000 to acquire the mill, mill controls, a new air compressor and a new control room.

Then the department's in-house engineering group, the Project Engineering Branch went to work planning and engineering the installation of the new mill and compressor. Please see NEW MILL, Page 9

China Lake Ski Club offering trip to Lake Tahoe ski areas next year

China Lake and Ridgecrest area skiers can take advantage of a chartered ski-bus trip to Lake Tahoe, Feb. 1-4. The trip, sponsored by the China Lake Ski Club, will cost \$259 to \$285 per person, depending on the number of people in a room. Ski Club members receive a \$20 discount.

The price includes all transportation, refreshments en route, three days of lift tickets, three nights lodging and some meals.

Skiing will be at Heavenly Valley (2 days) and Kirkwood.

Reservations are needed now and full payment is due Jan. 7. For reservations call Dennis Rowell at 446-5049 or Lee Wood at 377-5085.

DoD Sports Council announces 1993 armed forces tourney slate

The Department of Defense's Armed forces Sports Committee recently released the Interservice Sports Tournaments Calendar for 1993.

Each service holds its own tournaments to determine who will represent it at the DoD-level tourneys. For more information concerning the armed forces or specific service tournaments, including dates and prerequisites, call Elaine Arnell, head of the Morale, Welfare and Recreation Department Sport Division, at 939-2305.

Interservice championship dates and sites for 1993 are:

- Men's Basketball; Presidio of San Francisco; March 11-16;
- · Women's Basketball; Randolph AFB, Texas; March 25-30;
- · Bowling, Men's & Women's; Eglin AFB, Fla.; April 18-24;
- · Boxing; Camp Lejeune, N.C.; Feb. 1-6;
- · Golf; Tyndall AFB, Fla.; Sept. 13-17;
- · Racquetball, Men's & Women's; Offutt AFB, Neb.; May 16-21;
- · Softball, Men's & Women's; Maxwell AFB, Ala.; Aug. 10-16;
- Tennis; Marine Corp Recruit Depot San Diego, Calif.; Sept. 19-24;
- Track & Field; Fort Benning, Ga.; June 1-7;
- · Volleyball, Men's & Women's; Fort Indiantown Gap, Pa.; May 8-15;
- · Wrestling; Quantico Marine Base, Va.; March 17-22.

Rent skis from MWR for holidays

This holiday season, skiing in California is better than it has been in a number of years according to ski area operators. China Lakers can take advantage of the snow and cold thanks to the ski rental program of the MWR Department.

The Gymnasium Gear Issue Office at the NAWS China Lake has a wide assortment of gear available to rent. A \$20 deposit is required. Rental prices are as follows:

E-1/E-3 — \$5 per day, \$10 per weekend and \$25 for seven days (straight).

E-4/E-6 — \$6 per day, \$15 per weekend and \$32 for seven days (straight). E-7/E-9 — \$7.50 per day, \$18 per weekend and \$43 for seven days (straight).

WO/O-3 — \$8 per day, \$19 per weekend and \$44 for seven days (straight).

O-4 and above — \$9.50 per day, \$21 per weekend and \$55 for seven days (straight).

DoD — \$10 per day, \$22 per weekend and \$60 for seven days (straight).

The fee for retired military is the rate at which he, or she, retired.

Appointments for ski fittings, which are required, may be made Monday through Thursday from 8 a.m. to 4 p.m. by calling 939-2334.

Bombers rout the Dawgs, capture top seeded loop playoff position

In last week's feature game, the P.E. Bombers hammered the Dirty Dawgs 30-6 to remain atop the Adult Flag Football League standings at China Lake. The victory also clinched the top seed position in the upcoming league playoffs for the Bombers.

Despite cold and wet conditions, the Bombers easily toppled the Dirty Dawgs thanks to a pair of touchdown runs by Daryl Brown, quarterback for the winning squad.

Building on to their 14-0 halftime lead, the Bombers made it 22-0 when Brown connected with Vernon Nabors on a TD pass. Brown hit Johnnie Stewart

The only offensive rally by the Dawgs

came on a Leslie Lewis to Fred Lewis touchdown pass. The Dirty Dawgs were blanked for the rest of the game.

Brown connected with Nabors for a final touchdown pass and then found Mike Watkins in the end zone for the two-point conversion and the Bombers had their 30-6 triumph.

In other games last week, SAAK stopped Fine Line 20-6, P.E. Bombers rolled over Mad Dogs 82-0 and Night Attack gridders beat ASF 20-6.

The league starts a holiday break this week. Play will resume in January for make up games and the playoffs. The top four regular season team will vie in the playoffs for berths in the China Lake

MWR seeks volleyball and hockey athletes for spring play at NAWS

Advance registration for the 1993 Youth Volleyball and Youth Hockey seasons are now underway at the Youth Activities Branch of the Morale, Welfare and Recreation Department at China Lake. Registration continues through Jan. 4. The seasons begin

Youngsters 7 to 14 years old are eligible to participate in volleyball. Hockey, in two division, is open to all ages. Fees range from \$16 to \$23 for the first child from a family per sport. Discounts apply for families with more than one child participating.

Evaluation of volleyball and hockey league participants is set for Monday, Jan. 4 from 6 to 8 p.m. at the China Lake Youth Center. Parents of volleyball athletes will be notified of team placement after the Jan. 14 coaches meeting. Parents of hockey athletes will be notified of team placement after the Jan. 13 coaches and referees meeting. Volunteer coaches and referees are needed for these leagues. For details on fees and sched-

Cerro Coso College, Ridgecrest plan winter baseball camp

Cerro Coso Community College's Baseball Program will be offering a Winter Baseball Camp Dec. 28-30 for youths age 8 to 18. The camp will be coordinated by Cerro Coso Coyote Head Coach Dick Adams. The cost is \$60 for three days. The camp will be held at the Kerr McGee Athletic Complex in Ridgecrest. Call 375-5001, ext. 386.

NEW MILL, from Page 8

December 17, 1992

Bill Styer (now deceased) and Jim Embry were the project engineers for the effort. When the drawings were complete the focus was shifted to the shops for installation.

"During the installation we pulled all the talents from the process support and equipment support sections together," said Gordon Fawkes, now head of the Ordnance Support Branch, "then reshuffled that talent into a construction brigade and a maintenance brigade to make sure that we had enough support for the day-to-day plant maintenance during the construction period.

"And they did a very commendable job," he said. "When the field service team from Aljet (the mill manufacturer) came out to turn the system on and train us in its use, they were very impressed with the engineering and professionalism of the installation."

There is no liquid involved in a fluid energy mill. The "fluid" energy that drives the process is highly compressed air. The new compressor (which is also used for another mill) supplies air to the Aljet mill at 95 pounds per square inch at the pusher nozzle, which draws the ammonium perchlorate into the donut shaped grinding chamber. This pressure together with similar pressure from six manifold nozzles equally spaced around the chamber, creates an internal "wind" speed of some 750 feet per second.

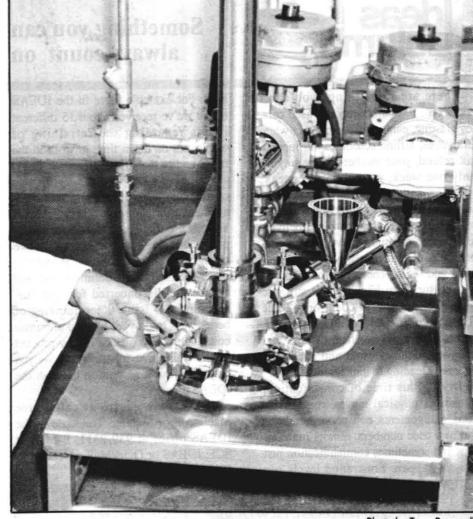

"It creates a miniature 'super' hurricane inside the mill," said technician Larry Lesniak, who will operate the mill for C2772. "The force of the particles colliding with one another and against the walls on the inside of the mill is what causes them to break down to the appropriate size."

Howard Gerrish, also of C2772, added that centrifugal forces inside the mill will keep larger particles circulating at the outer edges of the chamber, while the threemicron and smaller particles will drift to the center and be lifted out by the air stream flowing through extraction piping. The exhausted air then flows through a filtered hopper where the fine-particle AP is collected.

Both Gerrish and Lesniak were enthusiastic about the mill's efficiency over the Sweco grinder (the ceramic bead grinder).

"This mill not only brings us into environmental compliance," said Gerrish, "but it's much faster than the Sweco process. It processes 50 pounds of fine AP per hour and there is no drying time. With the Sweco it took seven hours to get 80 pounds, and then it had to dry for seven days." The effort was another good mark for TQL and teamwork, according to Tony Dorsey.

"The success of the project can be attributed to the team approach," he said. "Technical operators, facility engineers and craftsmen all contributed their expertise to produce a well-rounded project. No one faction could have done it alone."

SMALL, BUT MIGHTY—Fluid energy mill is dwarfed by attendant equipment, but the little grinding chamber grinds 50 pounds of ammonium perchlorate per hour. Larry Lesniak points out one of the manifold nozzles that helps to create internal 'wind" speed of 750 feet per second.

BUSINESS ENTREPRENEURS IN COMPUTER INDUSTRY!

Build a successful independent business in partnership with Sun Microsystems Computer Corporation, a leading worldwide supplier of distributed computing technologies.

Sun is looking for a seasoned business professional who is capable of building a first-class organization to serve the computing needs of China Lake customers and prospects.

The successful candidate will have several years experience in senior computer sales and business management, and be ready to invest in the future with one of the world's fastest growing major computer companies.

For further information, please fax a resume or business summary to (818) 905-05841, or call Steve McKenna, District Manager, Sun Microsystems at (818) 905-0200.

Responses will be kept in strictest confidence.

Serious candidates only with investment capital please. No agencies.

Wellness

Holidays

Happy, Healthy,

Pleasurable

Is the house decorated, all the baking done, cards sent out with a personal note to each person, presents purchased and wrapped? Are you stressed with the hustle, bustle and expectations of this time of year? According to Dr. Rita McCullough Stanley of Ridgecrest's New Hope Counseling Center, here are some of the reasons and some remedies for holiday

Reason: Unrealistic expectation. Remedy: Set realistic expectations. You don't have to be perfect, others are not perfect, this holiday probably won't be perfect.

Here are some fire-wise tips for a

Blow out candles and turn off inside

lights and electrical decorations before

safer, more enjoyable Christmas season.

Reason: Separation from family due to one of the three D's-divorce, death, or distance.

Remedy: Accept your feelings rather than fight them. Allow yourself to feel your painful feelings and give yourself time to heal. Talk out your feelings about the loss with someone. Reach out to someone who may be as lonely or lonelier than you. Don't be alone.

Reason: Being too busy and trying to do too much.

Remedy: Plan ahead. Decide what tasks you want to accomplish and break

A fire-safe

Christmas

you leave the house. If you plan to leave

a room for an extended period, it's wise

to shut off lights and decorated items in

that room too. Choose only deep seated

them down into small steps. Set a timetable for accomplishing each of the small tasks. Pace yourself. Ask for help. Delegate tasks. And don't exhaust your-

Reason: Financial burdens.

Remedy: Realize the media bombards us with unrealistically high expectations. Set a budget and stick to it. Give inexpensive gifts of time, talent, or service.

Reason: Upset in the regular routine and increase in unstructured time.

Remedy: Provide the missing structure by setting goals for the holidays, planning some special activities, getting time alone, and planning activities to occupy the children.

Reason: Conflict with family and relatives with whom you get together.

Remedy: Don't get together with them. If you do get together, communioptions for conflict resolution. Plan activities to avoid boredom and as a diversion from conflict. Take a break. Reason: Doing too many "shoulds."

cate your expectations, role-play or write

down in advance how you might deal

with potential conflict, and generate

Remedy: Separate your "shoulds" from your "wants," and realize you have a choice-you may choose to eliminate some "shoulds" and do more "wants."

Reason: Losing sight of the real reason for the season.

Remedy: Ask yourself the following two questions-"What, to you, is the purpose for the holiday season?" and "What three things related to your single purpose for the season do you want to accomplish this year during the holiday season?" Stay focussed on these goals, and eliminate whatever else would distract you from your goals.

candles or those with hurricane glass Exchange gifts fire-wisely, set out

colorful department store shopping bags, and dispose of gift wrappings in the bags as soon as each gift is unwrapped. Then discard the filled bags in a metal trash can before the evening is out.

Boxes and other manufacturer-provided packaging should be disposed of promptly, too. Save only those boxes which may be required to ship defective mechanical or electrical gifts back for warranty repair.

Here's a tip for choosing and check a live Christmas tree for freshness. Pull out a needle and squeeze it between your thumb and forefinger. If it flexes, the tree is still moist. If it snaps, reject the tree, or if it's already in your home, dispose of it at once.

Christmas should be a festive season. Beat fire at its own game and don't let a tragic blaze ruin your holidays.

PERSONNEL NEWS

PROMOTIONAL OPPORTUNITIES

Applications for positions listed below are being accepted from Department of Navy Employees currently sited at NAWS, China Lake and from eligible employees of attached activities who are permanently assigned to the China Lake site. This group includes employees with career or career conditional appointments, employees with permanent Veterans Readjustment Act (VRA) appointments; temporary employees with reinstatement eligibility; and handicapped employees with Sch.(A) continuing appointments. Also included are spouses, with competitive status, of civilian sponsors hired by a DOD activity within China Lake's commuting area. Applications from other groups will be accepted when specified in advertisements listed herein. Vacancies are subject to restrictions imposed by the DOD Priority Placement Program. Applicants must meet all legal and regulatory requirements, including minimum qualifications, by the closing date of the advertisement. Evaluation of applicants qualifications will involve using at least two assessment measures are work experience, annual performance assessment rating and narrative, education, training, and awards.

Eligible spouses, of military sponsors, with competitive employment status or eligibility under E.O. 12362, must register in the DOD Priority Placement Program to be eligible for

usal preference. Those enrolled in this program will automatically receive consideration for employment on vacancies for which they qualified. For initial er counseling and enrollment, call 939-3317 for an appointment.

HOW TO APPLY: Submit the following: a current application, SF-171 or other Human Resources Department pre-approved form, a copy of your most recent annual performances. assessment narrative (note: a copy of your performance plan should be attached if the annual performance narrative does not clearly state the task/duties performed); and a completed Background Survey Questionnaire. A supplemental narrative which relates your qualifications to each knowledge, skill, or ability (KSAs) as cited in the advertisement is highly recommended and may be required if stated in the vacancy announcement. Write the title, series, level (grade), and announcement number on all application materials. Not submitting the annual performance narrative may adversely affect your evaluation score. Prior to submitting your application, complete Cover Sheet Form 12335/2, available at the reception of the submitted description of the property of the submitted property of the submi tion desk. Make sure your address, phone number, etc., are current, correct and that all forms are complete and accurate. If any of this information is missing, your qualifications may not be fully and completely rated. Additional information cannot be submitted after the closing date of the announcement. A current date and signature on the last page completes the application. Civilian Spousal Program Eligibles with competitive status must submit a copy of their sponsor's PCS orders with each application in order to be considered for Merit Promotion vacancies which do not state that status eligibles may apply.

Application materials are accepted, and blank forms are available, at the Reception Desk, Room 100, Human Resources Department, 505 Blandy. Announcements close at 4:30 p.m. on Thursday, one week after the opening date of the announcement, unless otherwise specified. Applications received after 4:30 p.m. on the closing date will not be considered. Copies of Applications may be submitted since applications are kept in an announcement file and cannot be returned or filed in personnel folders. The Naval Air Warfare Center, Weapons Division is an Equal Opportunity Employer; selections are made without discrimination for any non-merit reason.

NOTICE REGARDING DRUG TESTING DESIGNATED POSITIONS

Any applicant tentatively selected for one of these positions will be required to submit to urinalysis to detect illegal use of drugs prior to a final selection. Final selection is continuously gent upon a negative drug test result, and thereafter the selectee will be subject to drug testing as the incumbent of a Testing Designated Position (TDP). Further, all Department of the Navy employees may be subject to drug testing under certain circumstances such as reasonable suspicion and after an accident. All individuals will have the opportunity to submit medical documentation that may support the legitimate use of a specific drug to a Medical Review Officer. An applicant's test results will be provided to the selecting official and servicing Civilian Personnel Office before a final selection is made. A verified positive drug test of a current Department of the Navy employee will also be provided to the employing nand. (NAVWPNCENINST 12792.2, 14 Dec 90).

MERIT PROMOTION

No. 29-007, Supervisory Interdisciplinary

Engineer/Physicist/Mathematician), DP-801/830/855/861/1310/ 1520-3. Code C2913 - This position is Head of the Missile Effectiveness Branch, Missile Systems Division, Intercept Weapons Department. The branch has the endgame effectiveness analysis charter for the Intercept Weapons Department. These analyses are based on missile versus target simulations from launch through lethality assessment. The branch is responsible for the operation and maintenance of the Encounter Simulation Laboratory (ESL) and the new Missile Engagement Simulation Arena (MESA) that provide fuze signature data for the endgame simulations. SECRETARIAL OPPORTUNITIES

This column is used to announce secretary positions for which the duties and job relevant crite-ria are generally similar. Secretaries serve as the principal clerical and administrative support in the esignated organization by coordinating and carrying out such activities. Secretaries perform numer-ous tasks which may be dissimilar. Positions at lower grades consist primarily of clerical and proce-dural duties and, as positions increase in grades, administrative functions become predominant. At the higher levels, secretaries apply a considerable knowledge of the organization, its objectives and lines of communication. Depending on grade level, typical secretary duties are implied by the job rele-

Applicants will be rated against four or more of the following job relevant criteria: (1) ability to per-form receptionist and telephone duties; (2) ability to review, track, screen and distribute incoming mail; (3) ability to review outgoing correspondence; (4) ability to compose correspondence and/or prepare non-technical reports; (5) knowledge of filing sys-tems and files management; (6) ability to meet the administrative needs of the office; (7) ability to train clerical personnel and organize workload of clerica staff processes: (8) ability to plan and coordinate travel arrangements; (9) ability to maintain and coordinate supervisor's calendar and to arrange

Unless otherwise indicated, applicants for branch secretary will be rated on elements 1/2/3/5/8; division secretary applicants will be rated on elements 1/2/3/4/7/8/9; Program Office secretary applicants will be rated on element OBTAINED IN ROOM 100 OF THE PERSONNE

No. 32-005, Secretary (Typing), DG-318-1/2, Code C3232 - This position is located in the Engineering Support Branch, Instrumentation Systems Division, Range Department. FRESHSTART-STOP SMOKING PROGRAM

Here's an opportunity to join with other smokers who desire to become nonsmokers in 1993. The American Cancer Society's Freshstart Program is a four session workshop scheduled for 21, 25, and 28 January and 1 February. Each session is 1 hour long (1600-1700) and will be held in the Training Center Trailer. The program is designed to help you transition from smoking to nonsmoking by providing you with information and strategies to direct your own efforts to change. The workshop will be limited to 10-15 people and will be led by a person trained by the American Cancer Society

Enrollments are on a call-in basis. Please call the Wellness Program Office. 939-2468, for information and enrollment. (Code C622)

MAMMOGRAPHY SCREENING

The Wellness Program (C62206) will sponsor a mammography screening for NAWC/NAWS employees and their spouses. Valley Technological Services (VTS) will have its mobile mammography unit at the Michelson Lab parking area on 27, 28 January and 10 February. The cost of the x-ray exam is \$60. Participants must be 35 years old to participate unless referred by a physician. VTS is accredited by the American College of Radiology.

To schedule an appointment call (800) 458-338. (Code C622)

NEW VOICE MAIL SYSTEM TO BE INSTALLED

The new Meridian Mail Voice Messaging System will be ready for operation on 18 December. All current users will be cut over to the new system by 21 December. As of 4 January, we will start installing new users into the system. We hope to have all new users up and running by the end of March.

With the new system, there will be two access numbers. If your mailbox has a prefix of 939, you will dial 939-3000; if your mailbox has a prefix of 927, you will dial 927-2400. Both of these numbers have AUTOVON capability.

Those of you who currently have a voice mailbox, must read and delete all messages by COB on 17 December 1992. at which time direct access to the old system will be denied. CASI will keep unread messages on the old system for 30 days, but you will have to contact the CASI trouble desk (611) for an access number. In addition, you will need to reset your password and greeting on the new system, since they will not be carried over from the

We will try to issue training manuals to everyone receiving a voice mailbox, but if you do not receive a manual they will be available through the Telephone Services Branch, Code C6314. If you have any further questions, contact Ruth Ellingson, Code C6314(BCS) at 939-8788.

Remember that for security reasons, it is your responsibility to change your password within 5 working days of notification that your mailbox has been installed. The default password is for initial temporary access only, and access may be denied i your password is not changed. (C6314)

PLOTTER PAPER AVAILABLE

Code C8404 has one case of 11 x 17inch plotter paper available. Contact Donna Charles at 939-0842 if you are interested. (Code C8404)

TWO HP 9845C COMPUTER SYSTEMS AVAILABLE

XEROX FACSIMILES MAINTENANCE CONTRACT EXPIRES

On 16 December the Center-wide maintenance contract or Xerox facsimiles (FAX machines) will expire due to Centerwide budget cuts. There will no longer be "no cost" maintenance to the codes.

The Contracts Coordination Branch (C6331) is in the process of putting togeth er an indefinite delivery type purchase order for continuing remedial maintenance and preventative maintenance. This will be a per-call (time and materials) agreement. Until the new contract is in place, if your Fax machine needs repair you will have to prepare a 9-part stub for per-call repair. The per-call charge is \$135 for each half-hour, plus parts. Each additional 15 minutes is \$27.50. The average repair call is 1 hour, plus parts

Annabelle Lipinski at 939-3427. (Code

REVIVAL OF THE CHINA LAKE SUN USERS GROUP

The Sun Users Group (SUG) is in the process of being revived with monthly etings or some activities to begin in

January on a regular basis. The response to the F-Mail sent to the SUG alias was very low (6 out of 43). To get a better survev of the users of Sun workstations, the call is out for anyone interested in participating in a users group. If you are interested, send an E-Mail to "david.olanyk@chinalake,navy.mil (or david@enterprise)" or call 939-3879.

Include your name, code, phone number, E-Mail address, and what you would like to see in your user group. The only list we currently have is the SUG alias which does not allow us to get information to you if your machine is down. (C2952)

DECNET ADDRESS CHANGE AT CHINA LAKE

On 17 December at 1700, DECNet routing will be enabled between Main Site (Mich Lab) and the Airfield (NAF). All computers on the China Lake corporate network using DECNet will be required to change their DECNet address or they will be unable to communicate with other China Lake DECNet devices. This is a relatively simple procedure for most computers but usually requires the system to be rebooted for the change to take place. THIS CHANGE DOES NOT AFFECT THE NAME OF THE HOST MACHINE. All system administrators of registered DECNet devices should have received information on this change in the Guard Mail. If you have not received this information or have further questions, contact Ron Smith at the Network Management Center, 939-6661.

RETIREMENTS AND FAREWELLS

THERESA THOMASON

Theresa Thomason, Head of Staff for the Comptroller Department is leaving the area to accept a position at Patuxent River, Maryland. A luncheon will be held at Farris' at the Heritage on 8 January at 1130. The lunch menu will include your choice of beef stroganoff or chicken and rice at a cost of \$8.50 per person, which includes coffee/tea, tax, and gratuity. If you would like to attend, call Judy or Linda, 939-3917/3605, or Kim, 939-2140 by close of business 5 January. (Code

BILL UNDERWOOD

Bill Underwood (C03A03) will be retiring at the end of December after 36 years of Federal service, all of which were served at China Lake. A farewell party will be held on Thursday,14 January, beginning at 1800 at the Seafarer Club. A dinner will be served at 1900 at a cost of \$12 per person. Dinner will include a choice of sirloin beef or chicken in orange sauce. For tickets, presentations, or gift donations contact Peggy Bell at 939-3880 by 7 January 1993.

DARRELL BYMOEN

Darrell Bymoen (Code C2942) retired on 2 December after 29 years of federal service, 26 of which were served at China Lake. Darell has worked on a variety of projects at China Lake including Swimmer Weapon Systems, Vertical Launch ASROC, Sidewinder AIM-9R, and Multi-Mission Propulsion Technology. A farewell party will be held on Friday, 8 January at 1730 at the Seafarer Club. A buffet dinner will be served at 1800 at a cost of \$11.00. For tickets, presentations, or gift donations contact Darla Siler, 939-1207/4571 or Max Moffitt 939-4733 by 6 January. (Code C2942)

This is the only course of its kind to offer the ABCD's of professionalism with emphasis on professional behavior, productivity, and performance. Strategies for career development, improving customer/employee rela- agement, interruptions, and scheduling. This

equest for On-Center Training (Code C622)

tions, acquiring leadership skill, and achieving goals and climbing the corporate ladder are offered in this dynamic training program. This course offers a peak performance hands-on approach on how to think, act, write, and look like a pro, and also achieve credibility and get recognition with positive, professional behav-

ior. To reserve your space in this workshop,

PROBLEM SOLVING & DECISION MAKING (16 hrs.)

call Pat at 939-3159.

12-13 January; Tuesday and Wednesday; 0800-1600; Training Center. By: Suzanne Hard, Consultant

Designed to develop your creative problem-solving abilities, this practical course will allow you to design your life more effectively by adopting problem-solving techniques that work and by eliminating ones that do not work. You will learn to recognize problems, anticipate difficulties, generate creative and realistic solutions against predetermined criteria, implement the chosen solutions, and eval-

Note: Enrollments are on a call-in basis only. To enroll, call 939-3159.

TIME MANAGEMENT STRATEGIES (8 hrs.) 11 January; Monday, 0800-1600; Training Center. By Suzanne Hard,

The focus of this course will be on interactive, experiential learning with time for analysis, feedback and development of action plans for individual participants. Dr. Hard believes in giving programs that offer pragmatic solutions to issues based on sound organizational theory and knowledge of group dynamics. Tools used will be mini-lecture, video tapes, group discussions, group and individual exercises, role playing, and assessments. Class topics include, but are not limited to: right brain versus left brain, delegation, setting priorities, and inventory of time manclass is intended for anyone who has multiple priorities and not enough time to go around.

Note: Enrollments are on a call-in basis only. To enroll, call Pat at 939-3159.

CAREER TRANSITION WORKSHOP 26 and 28 January: Tuesday and Thursday (plus pre- and post-interviews and a 2hour wrap-up session), Training Center. By: Cerro Coso Staff

This workshop is designed for employees who, either by choice or by circumstances, are considering retirement or transitioning to other jobs, either on- or off-Center. The workshop will include self-assessment of interests and abilities, development and evaluation of options, as well as resume writing and enhancing interviewing and job search skills. As preparation for the workshop, each participant will have an individual 20-minute pre-interview with the instructor. Each participant will also have a 20-minute post-interview with Training Center personnel. A 2-hour wrap-up session will follow. NOTE: THIS WORKSHOP IS ON 2-DAYS, TUESDAY AND THURSDAY. To sign up for this class, call Pat at 939-3159.

GENADMIN MESSAGE PREPARATION (4

20 January; Wednesday; 0800-1600; Training Center, By H2 Enterprises

This course is based on information obtained from Naval Telecommunications Users Manual, NTP-3. The purpose is to understand the background, purpose, and contents of the GENADMIN Naval Message Format. Participants will learn why the U.S. Armed Forces shifted to GENADMIN format. and when and how to use mandatory and optional SETs and FIELDs. The course will also review message requirements as outlined in Naval Telecommunications Users Manual, NTP-3. Many hints and tricks will be covered that can be used on a daily basis.

Note: Enrollment is on a call-in basis only. To reserve a space, call 939-3159.

INTRODUCTION TO EXERCISE (12 hrs.) 5 January through 11 February; Tuesdays and Thursdays, 1645-1745; NAWS Gymnasium, Discrete Room. By:

This is an introductory exercise program which will provide the opportunity for participants to practice:

- · Safe use of the gym's exercise equip-
- A stretching routine designed for relaxation and stress reduction

- Exercises designed to maintain a ming language such as Basic, Fortran,

healthy back

The joy of movement

The goal of the program is to develop an attitude of comfort and confidence with exercise. The class is reserved for people with little or no experience with exercise. Space is limited to allow individualized instruction.

Deadline: 22 December

Enrollments are on a call-in basis. Call the Wellness Program Office at 939-2468, for information and enrollment.

ADVANCED THRIFT SAVINGS PLAN (4

12 January: Tuesday, 1300-1700; Training Center. By: Charla Green, Consultant

This course is for all CSRS and FERS employees who are eligible to participate in the Thrift Savings Plan. The instructor will explain how the three Plan funds can fit into a personal investment portfolio. Information on financial goals, risk tolerance, and required rates of return will be presented to help participants determine an allocation and withdrawal strategy. The group will also discuss risk reduction techniques and learn how to choose and purchase a mutual fund. Ample time will be allowed for questions and group interac-

To enroll in this course, submit an On-Center Training Request to Code C62206. Point of contact is the Wellness Program Office, 939-2468.

TOTAL QUALITY LEADERSHIP OVERVIEW

Intended Audience: All employ

The general themes of this 1-day TQM workshop are Deming's 14 Points, his 7 Deadly Diseases, and an overview of his Management System with emphasis on team problem-solving processes. The workshop will provide coaching on "What to Do" by addressing data-gathering steps (Process Flow Charting), problem identification (Brainstorming and Pareto Charting), problem analysis (Force Field Analysis, Cause and Effect Analysis), and problem solution. Attention will be focused on "working on the right problem" and understanding the differ-Prerequisite: 6-months experience using ence between symptoms and causes. During general guidelines (organizational structure of

the discussion on "How To Do It," time will be devoted to understanding group dynamics and their application in developing problem solutions. Topics during this portion of the training will include developing facilitation skills, staying focused on the task, maintaining effective teamwork, and dealing with dysfunctional behavior. One case study will be used near the end to bring the training togeth-

REQUISITIONER'S WORKSHOP (Formerly called Small Purchase Acquisition Process)

5 January; Tuesday, 0730-1700; Training Center. By Linda Watkins, Code C6502

This is a "how to" workshop designed to familiarize Center personnel with the small purchase procurement process. Topics include preparation of 9-part stubs, purchase descriptions, commercial versus system orders, stub flow, lead times, GSA orders, and other information to assist and enlighten the "end user." This class will also include an overview of SPEDI.

Note: Enrollments are on a call-in basis only. To enroll or ask questions, call 939-

EVALUATING CONTRACTOR PERFOR-MANCE (16 hrs.) 7-8 January; Thursday-Friday, 0800-1600; Training Center. By Kris Kristensen,

Consultan Intended Audience: Any program manager or employee involved with monitoring or evaluating a contractors' performance.

The objective of this 2-day course is to provide the student with a solid background in the competencies necessary to enable the Navy manager to evaluate and manage a Navy contract. Participants will learn:

* To develop and use an effective cost/schedule control system to manage con-

To identify the flowdown of work authorization through the organization

To identify the earned value concept and its relationship to the terms: budgeted cost for work scheduled, budget cost for work per formed, and actual cost of work performed

To provide hands-on experience in creating a performance measurement baseline from contract data through budgeting and schedulina

To learn the analytical techniques used to measure cost/schedule performance and to orecast cost at completion of the contract

To identify the industry and government perspective on the analysis of performance

This information will be presented through classroom lecture and discussion and through the use of exercises involving team participation and hands-on applications

Note: Enrollments are on a call-in basis only. To enroll or ask questions, call 939-

ADMINISTRATIVE POLICIES AND PROCE-DURES FOR NEW SUPERVISORS (32 hrs.) 13, 14, 20, 21 January: Wednesdays and Thursdays, 0800-1600; Training Center. By

Intended Audience: New supervisors during the first year probation period

This mandatory 4-day course provides new supervisors with basic information about important NAWC/NAWS administrative policies and procedures.

Topics covered include: a summary of

DOD and subordinate commands, safety, security, Privacy Act, ethics, workers compen sation, plant account, Drug Free Workplace Program, and EEO including Prevention of Sexual Harassment), affirmative employment (merit promotion, reassignment, special-interest programs, interviewing and selecting new employees, reading a 171, and obtaining performance information from previous supervisors), employee development, employee awards (and other aspects about the DEMO system), discipline (problem behavior, poor performance), and other topics of interest to

Completing this course within the first 120 days of your supervisory probation period satisfies the mandatory training requirements for the probationary year for safety security, ethics, and prevention of sexual harassment.

Note: Enrollments are on a call-in basis only. To enroll or ask questions, call 939-

CULTURAL/GENERATIONAL GAP (4 hrs.)

14 January; Thursday, 0800-1130 or 1230-1600; Training Center. By Suzanne Hard, Consultant

Intended Audience: All NAWC/NAWS employees

This course will look at the demographic, economic, and cultural impact of four groups on our workplace effectiveness. The four groups are The Twenty-Something Generation, The Boomers, The Dinosaurs, and Gender. The workforce is changing more rapidly than ever. When values are so different, how do you motivate, coach, and train? The new crop of employees, sometimes referred to as the "Brash Pack," have an attitude....they want access, authority, and answers...and they want it NOW. How do you manage and motivate them? The Boomers (now 30-45 years old) find themselves squeezed in the middle by their own large numbers. They see the Dinosaurs above who are not retiring and the Brashers who are pushing from below. Finally, we have the Dinosaurs-the "Command and Control Managers." They are calling many of the shots...they have the history, the networks and the savvv...

Gender differences and styles may also affect your management effectiveness. Did you always want to know how the other sex thinks? You will hear the latest research on how men and women perform similar tasks differently, such as: leading meetings, team participation, project leadership, delegation,

This course meets the supervisor's yearly EEO training requirements

Note: Enrollments are on a call-in basis only. To enroll or ask questions, call 939-

CONTRACTING OFFICER'S TECHNICAL REPRESENTATION (COTR) (20 hrs.) 19-21 January; Tuesday-Wednesday,

0800-1600 and Thursday, 0800-1130; Training Center. By NRCC The purpose of this course is to enhance

the administration of service contracts. The course is for people who furnish technical input to contractors, evaluate contractor performance, and perform inspection and acceptance of services provided under contract. The training is designed to ensure that COTRs understand their responsibilities in administering service contracts.

Note: Enrollments are on a call-in basis only (first-to-call, first-to-be-placed). To enroll or ask questions, call 939-2686.

The NAWCWPNS/NAWS Announcements, published by the Technical Information Department (Code C64), disseminates work-related information to all Center personnel and is distributed to all personnel in the Rocketeer on Thursday. To ensure accuracy, all items must be submitted in writing, preferably double spaced, and must include a sponsor code and phone number. The collection dead-line for submissions is 1500 Monday. The following pick-up points for material have been established for the convenience of contributors: Room 100, Training Building (Carol Corlett, Code C622); Room 1000, Mich Lab; Room 203, Administration Building (Linda Brantner, Code C6101); and Room 212, TID Building (Ellen Mahoney, Code C6411). Items may be sent to Code C6411, or by FAX to 939-0565, Code C6411, ATTN: Ellen Mahoney, or mailed electronically to TID:ANC via the VAX. Any questions regarding the Announcements may be directed to Ramona Bernard, Code C6411.
